#### NARRATIVE STATEMENT

### Introduction

The Narrative Statement introduces the Statement of Accounts 2021/22 for the Nottinghamshire and City of Nottingham Fire Authority, which was formed as an independent body on 1st April 1998 following local government reorganisation. I write it as the Treasurer to the Fire Authority and as the Officer designated under Section 112 of the Local Government Act 1972. My role is to act on behalf of the Authority in providing oversight and ensuring legal compliance and governance in respect of accounting and financial matters which affect the Authority.

The Narrative Statement is intended to give the reader of these accounts a clear overview of the Authority's financial performance in the year and to put the Authority's non-financial performance into the context of the financial results.

I recognise that the accounts of the Authority can be quite daunting for readers, especially those who are unfamiliar with accounts in general and local government accounts in particular, so I hope that in taking the time to read the narrative statement, readers will be able to better understand how these accounts are constructed and how best to read and interpret them. It also explains more about what the core financial statements mean and explains how the notes to the accounts provide the reader with the detailed information to support the core statements.

The accounts have been prepared in accordance with the Code of Practice on Local Authority Accounting in the United Kingdom 2021/22, which is published by CIPFA.

# **Background**

The County of Nottinghamshire covers 838 square miles with a mixture of urban and rural areas. It has a population 1.15m, of which around half live in and around the City.

The Fire Authority has 24 Fire Stations, 8 of which are wholetime. 12 stations are crewed by on call staff and the remaining 4 have a mixture of wholetime and on call crews.

The Authority has a number of key plans and strategies which together enable the organisation to deliver its overall objective of creating safer communities.

The Strategic Plan 2019-2022 sets out the key priorities for the Authority for the three years 2019/20 to 2021/22. Progress against the Plan and relevant performance data can be found in the <u>Annual Statement of Assurance</u> which was presented to Fire Authority in July 2022 and can be found on the Authority's website.

The <u>Medium Term Financial Strategy</u> includes budgets for the next four years which support the delivery of services but within the context of financial sustainability.

# Performance during 2021/22

2021/22 brings to a close the delivery of our Strategic Plan 2019-2022. Performance against the Plan is reported to Fire Authority each year in the Annual Statement of Assurance (ASOA). The 2021/22 ASOA can be found on our website.

The service attended 10,096 incidents during 2021/22, which was a 12% increase from 2020/21. This included fires (3,390), false alarms (4,127), rescues (1,347) and road traffic collisions (563).

The service conducted 13,018 Save and Well visits, 559 Fire Safety audits and 119 business safety checks.

We attended emergency incidents in an average of 7 minutes and 51 seconds.

More information on all of this data can be found in the ASOA.

# **Impact of Covid-19**

2020/21 was one of the most challenging years our Service had ever faced. While maintaining our focus on preventing incidents, protecting and responding to you and assisting our partner organisations, we adapted to changed ways of working to react to the demands produced by the COVID-19 pandemic.

Whilst there was some ongoing impact in the first half of 2021/22, the last twelve months have had a more familiar feel, and we have been able to fully restore our services back to pre-pandemic levels.

#### Prevention

We continue to work closer than ever with our colleagues in other agencies to support early intervention for those most vulnerable in our county.

Our intelligence-led profile, CHARLIE-P, identifies the main factors that could increase a person's risk of a fire occurring in their home. These are: Care and support needs; Hoarding and mental health issues; Alcohol and medication; Reduced mobility; Living alone; Inappropriate smoking; Elderly and Previous signs of fire.

We use this profile to help improve the way partners notify us of people who may be at risk and to identify homes where we should target our Safe and Well visits.

Safe and Well visits allow us to offer advice on factors which increase vulnerability to fire and injury. This includes advice on stopping smoking, alcohol addiction, preventing falls, keeping warm in winter and general fire safety. We can also fit smoke alarms and arrange for other safety measures where necessary.

We monitor the effectiveness of our interventions and can refine the work we do as we aim to make every contact count.

Many of our staff within the Prevention department have undertaken additional roles over the past year to support our response to the pandemic.

While our physical prevention activity has been limited, we have continued our online safety education, through our website and social media channels. During 2021/22, we supported numerous local campaigns alongside our partners, as well as 83 national safety campaigns.

We continue to play an active role in the Nottinghamshire Road Safety Partnership, Water Safety Partnership and Safeguarding Boards.

Our Firesetter programme has continued to provide valuable support and education for young people who have been referred to us.

We have improved the way we evaluate and quality-assure our prevention activities to make sure they are delivering the expected benefits. As a result, a high-risk review group has been created to review and follow up Safe and Well visits to particularly vulnerable people, to ensure that our actions have been effective and identify any further support needs.

#### **Protection**

Our protection work is focused on keeping people safe from fire in the buildings they live and work in. This includes business premises, hospitals and care homes, high-rise buildings, and apartment blocks. Our Protection department oversees a programme of activities and is responsible for enforcing fire safety legislation.

During 2021/22 we completed a thorough review of the risk-based inspection programme, to make better use of our resources by focusing on the highest risk premises.

Work has continued to improve fire safety standards in non-domestic premises across the county. We work in collaboration with other regulators including Building Control, Environmental Health, the Health and Safety Executive, Nottinghamshire Police, the Care Quality Commission, Ofsted and the Food Standards Agency, to ensure the best possible outcomes.

As part of our statutory duties to support businesses, our Business Education Advocates continued to provide guidance, support and advice on fire safety matters, using various platforms including our website and social media, working with business owners to improve standards.

# **HMICFRS** inspection

We welcomed an inspection team from Her Majesty's Inspectorate of Fire and Rescue Services last October, when we were able to demonstrate the improvement we have made since our last full inspection in 2019, which found the service to be Requiring Improvement in all three areas of effectiveness, efficiency and how the service looks after its people. The report identified 25 Areas for

The 2021/22 report was published on 27 July 2022 and can be found on the service's <u>website</u>. It rated the service as Good in all areas and acknowledged that the service had worked hard on the areas identified for improvement in the 2019 report. It did identify a further 4 Areas for Improvement. An action plan for addressing these areas is being developed to address the issues raised.

### Grenfell

We recognise the importance of learning from the tragedy that occurred at Grenfell Tower.

Since the Grenfell Tower inquiry, additional training and equipment have been provided to ensure that we are better prepared to deal with complex incidents in tall buildings. A new tall buildings procedure has been fully implemented and ongoing training exercises with regional partners continues to improve our preparedness for major incidents.

We continue to work with all UK fire and rescue services to develop working practices in response to Grenfell. We work particularly closely with regional partners to ensure interoperability and aligned practice, so we are prepared for significant incidents if they were to occur.

More details and performance statistics on all of the above can be found in the Annual Statement of Assurance.

# **Risk Management**

Risk management processes are well embedded in the Authority. A comprehensive set of risk registers is monitored regularly by senior managers and elected members. These are brought together in the Corporate Risk Register which identifies the highest overall risks to the Service. The highest risks currently identified on the Corporate Risk Register are:

- Inability to set a balanced budget and to contain spending within existing budgets Risk of overspending in 2022/2023 due to impact of uncertain national economic position high inflation / impact on pay awards / increasing interest rates / supply chain issues / ongoing war in Ukraine.
- Firefighter's Pension scheme impact of McCloud remedy and other ongoing legal cases.
- Mobilising the Service is unable to receive and act on emergency calls;
- **Employee engagement** Risk that the Service will be unable to effectivey deliver high quality services or improvements due to a lack of employee engagement and/or low morale.
- Workforce sustainability Inability to maintain sufficient or adequate workforce to meet service requirements, competency of staff, loss of corporate memory and business continuity issues

By its nature, risk will change over time and in response to both external and internal pressures. It is important, therefore, that the Authority's managers remain alert to these developments and the emerging risks. In times of austerity and organisational restructuring, there is a possibility that control measures which had previously been seen as satisfactory may become eroded as resources reduce.

# Value for Money

Reducing levels of government grant funding, uncertainty about future business rate income and restrictions on the level of council tax which can be raise, have resulted in an increased emphasis on seeking value for money in all that we do. The Service has had to find a balance between economy (spending less money), efficiency (working smarter), effectiveness (delivering relevant services).

The Authority set a balanced budget for 2021/22 (£45.302m) and 2022/23 (£47.006m) with a deficit position of £654k in 2022/23.

The 2021/22 Band D Council Tax level was set at £82.95 (£1.59 per week). Council Tax levels for other property bands can be found in the table below.

2021/22 Council Tax levels

Band	Council Tax 2020/21	Weekly Charge
	£	£
Α	55.30	1.06
В	64.52	1.24
С	73.73	1.42
D	82.95	1.59
E	101.38	1.95
F	119.82	2.30
G	138.25	2.66
Н	165.90	3.19

The National Framework contains the continued requirement for the authority to have an Integrated Risk Management Plan (IRMP), which is delivered through the Authority's Strategic Plan. The 2019-22 Strategic Plan ended in March 2022. The service has undertaken a fire cover risk review to assess risk across Nottinghamshire. This has been used to develop the next strategic plan (known as the Community Risk Management Plan) of the Authority, which was approved by Fire Authority in February 2022. CRMP

One way of achieving value for money for Nottinghamshire residents is by collaborating with other emergency services and local councils. During 2021/22 the Service moved into a Joint Headquarters with Nottinghamshire Police . Our staff have started moving over from our site at Bestwood Lodge, with all moves expected to be completed by autumn 2022. This will complete the collaboration project which has been a three-year strategic action. This will enable the services to work more closely in the future which is expected to deliver some efficiencies.

We have built a new £3.4m fire station off Sandy Lane, Worksop. The new station replaces the one at Eastgate which was built in 1963. The station was officially opened in May 2022.

Work continues to improve the use of technology across the organisation to enable improved efficiency.

# The Core Statements

The Statement of Accounts contains several core statements. Details of these are included in the section below.

# **Movement in Reserves Statement**

This statement shows the movement in the year on the different reserves held by the Authority analysed into usable reserves, which can be applied to fund expenditure or reduce local taxation, and other reserves. The Authority holds reserves for two reasons. There are always issues which may arise for which the Authority has no specific budget but in order that these "one off" type events do not unduly impact upon a single year's budget it is wise to maintain some money to deal with these events should they occur. These are what are known as General Fund Balances. The General Fund Balance was increased by £200k during the year to £5.191m.

Similarly, the Authority may wish to hold back sums of money because it knows that certain items of expenditure will occur but that these are of a "one off" nature and it is uncertain as to when they will occur. These are called earmarked reserves because they are for a specific purpose. £0.857m was removed from Earmarked Reserves during 2021/22, making a balance of £4.853m. The decrease was due to allocations of the overspending during the year Revenue and Capital Outturn see reported to Finance and Resources Committee on 24 June 2022 for more information.

The Treasurer is required to assess the adequacy of these reserves to meet future events and issue a statement annually to that effect.

It is important to note that some of the Authority's reserves which appear on the balance sheet cannot be used to fund expenditure. An example of an unusable reserve would be the Revaluation Reserve, which contains the gains made by the Authority arising from increases in the value of its Property, Plant and Equipment and Intangible Assets.

This puts the service in a good financial position going forward. At its meeting on 17 December 2021, Fire Authority set a minimum level of general fund reserves of £4.5m. Medium Term Financial Strategy. The service is not expected to require general fund reserves to meet expenditure in 2022/23.

# Comprehensive Income and Expenditure Statement (CIES)

This statement brings together all the items of income and expenditure which constitute the *accounting cost* in the year of providing services in accordance with generally accepted accounting practices. This is not the same as the amount of expenditure to be charged to the General Fund as reported to Finance and Resources Committee in the Revenue and Capital Outturn report on 24 June 2022. This is because the CIES includes accounting adjustments such as depreciation and changes in the valuation of assets, including pensions, in an attempt to show the full cost of service provision rather than just those costs which require funding from taxation.

The Total Comprehensive Income and Expenditure shows a surplus of £34.989m (compared to a deficit of £111.595m 2020/21. Whilst this figure is very large it needs to be considered in the context of the total pension fund liability of £634.770m shown in the Balance Sheet.

# **Expenditure and Funding Analysis**

The Expenditure and Funding Analysis reconciles the expenditure shown in the CIES (the *accounting cost* of services) with the expenditure to be funded from taxation (shown in the column entitled Net expenditure chargeable to the General Fund). Whilst the Expenditure and Funding Analysis is not a core statement it has been included in the core statement section as it provides a useful link between the CIES and the Movement in Reserves Statement.

### **Balance Sheet**

The Balance Sheet shows the value of the assets and liabilities recognised by the Authority at 31st March. The net assets of the Authority (assets less liabilities) are matched by the reserves held by the Authority and thus the Balance Sheet is "in balance". The reader will notice that the total on the Balance Sheet is a negative figure of £585.141m, which means that the Authority's liabilities exceed its assets. This would usually be a cause for concern, however in this case the large liability in question relates to future pension liabilities (£634.770m) which at present are funded by Central Government. The underlying financial position of the Fire Authority is a strong one because when this pension liability is excluded, assets exceed liabilities by £49,629m.

# **Cash Flow Statement**

This statement, as its name suggests, shows the changes in cash and cash equivalents of the Authority during the year. The starting point for this statement is the net surplus or deficit on the provision of services shown in the CIES, as this might suggest what the movement in cash balances has been. There are however a number of charges that are made to the revenue account that are not cash transactions and that merely result in a transfer of funds between the balance sheet and the revenue account.

The statement shows how the Authority generates and uses cash and cash equivalents by classifying cash flows as operating, investing and financing activities. The amount of net cash flows arising from operating activities is a key indicator of the extent to which the operations of the Authority are funded by way of taxation and grant income or from the recipients of services provided by the Authority. Investing activities represent the extent to which cash outflows have been made for resources which are intended to contribute to the Authority's future service delivery. Cash flows arising from financing activities are useful in predicting claims on future cash flows by providers of capital (i.e. borrowing) to the Authority.

The resultant figure shows the real movement in cash during the year, which is a Increase in cash of £2.766m.

#### **Pension Fund Account**

This statement shows the income and expenditure for the year relating to the Firefighters' Pension Schemes. The net amount payable for the year i.e. the extent to which pension benefits payable exceeded contributions, is £9.358m.

### **Pension Net Assets Statement**

This statement shows the net current assets and liabilities arising from the operation of the Firefighters' Pension Schemes. This statement does not take account of liabilities to pay future pensions and other benefits after the period end. Such liabilities are shown in the Authority's Balance Sheet, as explained above.

# **Annual Governance Statement**

This statement sets out the Authority's responsibilities with regard to corporate governance and gives details of key elements of corporate governance in place during the year. It also summarises the Authority's review of the effectiveness of its governance framework, measured against the CIPFA / SOLACE framework, and in which issues for action are highlighted.

# Summary of the Year

A summary of the Fire Authority's overall financial results is given in the following paragraphs:

# Revenue Income and Expenditure

The 2021/22 revenue budget for of £45.302m was approved by the Fire Authority in February 2021. Budget

Expenditure on budgeted activity for the year was £45.101m – an initial underspend of £201k. This represents 0.99% of the budget.

At its meeting on 24 June 2022, Finance and Resources Committee approved to use an additional £163k of unspent grants to be transferred to the Earmarked Reserves finance. More information can be found in the Revenue and Capital Outturn Report

A summary of expenditure following movements to Earmarked Reserves is shown below.

	Annual Budget 2021/22	Actual 2021/22	Variance 2021/22
	£000's	£000's	£000's
Employees	37,132	37,179	47
Premises	2,839	2,707	(132)
Transport	1,823	1,951	128
Supplies & Services	3,959	3,972	13
Third Party Payments	883	877	(6)
Support Services	166	104	(62)
Capital Financing	2,587	2,929	342
Income	(2,818)	(3,760)	(942)
Budgeted contribution from Earmarked Reserve	0	0	0
Contribution from Earmarked Reserve in-year	(1,438)	(1,412)	26
Contribution to Earmarked Reserve	169	555	386
Net Expenditure	45,302	45,102	(200)
Funded by:			
General Fund Reserves	0	203	203
Business Rate Covid Relief Grant	(1,573)	(1,576)	(3)
Pension Grant	(2,340)	(2,340)	Ô
Revenue Support Grant	(5,452)	(5,452)	0
Non-Domestic Rates	(9,287)	(9,287)	0
Council Tax	(26,650)	(26,650)	0
Total Funding	(45,302)	(45,102)	200

# **Capital Expenditure**

Capital expenditure describes the purchasing, upgrading and improvement of Fire Authority assets. These assets are known as "non-current assets" and they provide a benefit to the Authority over a longer period of time than the current financial year. A summary of the Capital Programme and actual expenditure for the year is shown below.

	Revised Budget 2021/22	Actual 2021/22	(Under) / Over spend 2021/22	Slippage to 2022/23
	£000	£000	£000	£000
Transport	512	318	(195)	195
Operational Equipment	359	252	(107)	106
Property	6,659	5,505	(1,154)	1,076
IT & Communications	1,151	424	(727)	727
Total	8,681	6,499	(2,183)	2,104
Funded by:				
Borrowing		5,499		2,104
Earmarked Reserves/Revenue		127		0
Revenue Contribution to Capital		400		0
Capital Receipts		473		0
Total	0	6,499	0	2,104

The main areas of spend are detailed below:

- One of the largest schemes in the 2021/22 capital programme related to the new Joint Head Quarters with Nottinghamshire Police £2.107m expenditure during the year. Whist £671k has been moved to 2022/23, the project remains on track to be completed 2022.
- Worksop expenditure in 2021/22 is £3.268m with £394k being slipped into 2022/23. This project is to be completed and operational 2022/23.
- £424k was spent on ICT equipment some of this was to Mobile computing project (£88k), work for the cloud migration at HQ (£13k), Replacement Equipment (£151k) and the Rostering Project (£17k).
- Expenditure on Equipment of £252k is for the following; firefighter gloves (£95k), CCTV on vehicles (£94k), Water Rescue (£19k) and Air Bags (£43k).

Total slippage for the capital programme was £2.104m. Again, more information can be found in the Revenue and Capital Outturn report.

# Treasury Management Activity

During the year, £5.499m of capital expenditure was funded from borrowing. The Authority borrowed £4m long term loans from the Public Work Loans Board (PWLB). The Authority's level of borrowing at the yearend was £32.952m. The capital financing requirement as at 31 March 2022 is £30.594m, which demonstrates that the current level of net borrowing is prudent.

There was no temporary borrowing outstanding at year end to cover cashflow shortfalls, so total borrowing was £32.952m as at 31 March 2022. This remains within the Operational Boundary set by Fire Authority of £33.255m.

### Reserves

Earmarked reserves are held either for unspent grant or set aside to fund specific areas of expenditure, usually of a one off nature. Earmarked Reserves are reviewed annually in the Reserves Strategy which can be found appended to the <a href="Medium Term Financial Strategy">Medium Term Financial Strategy</a>. Earmarked reserves totalled £4.853m at 31 March 2022. A further breakdown can be found in note 11.

# **General Reserves**

£5.191m were held at 31 March 2022, against a minimum level set in the Reserves Strategy of £4.5m. The use of general fund reserves is not expected to be required in 2022/23. The service has set a balanced budget for the year. The service has sufficient reserve levels to enable it to plan for any reductions in funding in a measured way.

# Pension Funds

Standard accounting practice requires the Authority to show the full future pensions liabilities at the time that these liabilities are earned by employees. An independent actuary has assessed the liabilities for pension schemes in which the Authority participates, namely the Firefighters' Pension Schemes and the Local Government Pension Scheme. The schemes are currently in deficit, which shows as a total liability of £634.770m on the balance sheet. The largest element of this liability relates to the Firefighters' Pension Schemes and stands at £604.607m.

The Firefighters' Pension Schemes are unfunded and the annual cost of benefits is paid for by employee contributions and employer contributions. The Home Office meets any annual shortfall i.e. if the contributions into the fund do not meet the cost of pensions paid in the year. The Authority is required to continue to show the liability in respect of the Firefighter Pension Schemes in its Balance Sheet and notes to the core financial statements.

An employment tribunal case was brought against the Government in relation to possible discrimination in relation to the introduction of the 2015 Firefighters' Pension Scheme. The scheme included transitional protection arrangements between the old scheme and the new scheme. These transitional arrangements were found to be unlawful as they discriminated on the grounds of age. Fire Authorities are in a difficult position as they are required to implement the remedy in a timely manner whilst the discriminatory part of the pension legislation is not expected to be updated until at least October 2023. Following the ruling, the Fire Brigades Union (FBU) commenced legal proceedings in the High Court for three test cases, two of which were against Nottinghamshire Fire and Rescue Authority. These were settled out of court.

After the withdrawal of its Immediate Detriment guidance, the government are not recommending that Immediate Detriment cases are addressed until new legislation is in place due to the difficulties particularly around tax arrangements. However, due to the risk of future litigation, the Authority approved continuation of applying immediate detriment remedy at its Policy and Strategy meeting on 1 April 2022. It is not yet clear what future costs the Authority will face in implementing the McCloud remedy and whether there will be any new burden grant available from the government to cover these costs, which could be significant. The Authority approved the creation of a £200k earmarked reserve to cover potential McCloud costs in April 2022 and McCloud has been identified as a contingent liability in the Accounts.

# Other Significant, Material and Unusual Items

# **HMICFRS** Inspection

The 2021/22 report was published on 27 July 2022 and can be found on the service's <u>website</u>. It rated the service as Good in all areas and acknowledged that the service had worked hard on the areas identified for improvement in the 2019 report. It did identify a further 4 Areas for Improvement. An action plan for addressing these areas is being developed to address the issues raised.

### Collaboration

In January, we officially unveiled the new joint fire and police headquarters at Sherwood Lodge. Our staff have started moving over from our site at Bestwood Lodge, with all moves expected to be completed by autumn 2022. This will complete the collaboration project which has been a three-year strategic action.

# Covid-19

The Service coped well during the Covid-19 outbreak with no significant impact on service delivery. It was able to provide support to East Midlands Ambulance Service, the vaccination programme and to local communities through the delivery of food parcels and medicine to residents in need. Governance arrangements were impacted during 2020/21 with some temporary emergency measures put in place. These were no longer required in 2021/22 with governance arrangements and working practices returning to normal.

#### Plans for 2022/23

Elected Members of the Fire Authority approved a council tax increase of 1.95% for 2022/23 with a Band D council tax of £84.57 (£82.95 2021/22). The revenue budget for 2022/23 has been set at £46.006m (£45.3m 2021/22) with a planned use of general fund reserves of £153k 2022/23. The budget includes £1.9m of government grant to cover Business Rate loss of income due to business rate reliefs (mostly Covid related) and £2.4m to cover the expected increased costs of the firefighter pension employer contribution following the changes to the discount rates applied to the scheme. A further £748k one off New Service Grant was received – this is unlikely to be repeated in future years.

A pay award of 3% was assumed in the 2022/23 budget. Whilst pay negotiations are ongoing there is a risk that the actual award will be higher than this due to current inflation rates which were not anticipated at the time the budget was set. However, the 2022/23 budget monitoring position as reported to Finance and Resources Committee up to the end of May 2022 showed an underspend of £469k, which would be sufficient to cover a pay award in the region of 5%.

Funding for 2023/24 to 2025/26 will be determined as part of the Government's spending review which will not be announced until Autumn 2022. Whilst both funding and costs are difficult to predict in the current financial climate, the service is anticipating that savings will need to be made. The Futures 25 Efficiency Strategy was approved at Policy and Strategy Committee in May 2022 and a further report will be presented to Fire Authority in September 2022 to identify areas where the likely savings can be made. These are expected to include both reductions in staff costs and non staff costs. Final proposals will be agreed once the funding position becomes clearer early in 2023.

The service has created earmarked reserves totalling £1.8m to support the Futures 25 Efficiency Strategy and to mitigate future budget pressures. It has also taken early action to reduce costs during 2022/23 by delaying recruitment and holding vacant posts. This both helps avoid any redundancy costs and also provides savings to fund any transitional arrangements as the service moves to different ways of working.

Despite the uncertainty going forward, the service is confident that it is in a position to react should it find itself needing to reduce expenditure in order to balance the budget in future years. The service is currently underspending against with the 2022/23 approved budget and reserves are sufficient to allow a period of transition should changes in service delivery models be required.

This year has also embarked on 3-year Community Risk Management Plan. This sets out our long-term ambition to be one of the best fire and rescue services in England by 2030, with a continued focus on preventing incidents, protecting you and responding when you need us.

Becky Smeathers CPFA

Becky Smeathan

Treasurer to the Nottinghamshire and City of Nottingham Fire Authority

# STATEMENT OF RESPONSIBILITIES FOR THE STATEMENT OF ACCOUNTS STATEMENT OF ACCOUNTS 2021/22

# The Authority's Responsibilities

The Authority is required to:

- i) make arrangements for the proper administration of its financial affairs and to secure that one of its officers has the responsibility for the administration of those affairs. In this Authority, that officer is the Treasurer;
- ii) manage its affairs to secure economic, efficient and effective use of resources and safeguard its assets;
- iii) approve the Statement of Accounts.

# The Treasurer's Responsibilities

The Treasurer is responsible for the preparation of the Authority's Statement of Accounts in accordance with proper practices as set out in the CIPFA / LASAAC Code of Practice on Local Authority Accounting in the United Kingdom (the Code).

In preparing this Statement of Accounts, the Treasurer has:

- i) selected suitable accounting policies and then applied them consistently;
- ii) made judgements and estimates that were reasonable and prudent;
- iii) complied with the local authority Code.

The Treasurer has also:

- i) kept proper accounting records which were up to date;
- ii) taken reasonable steps for the prevention and detection of fraud and other irregularities.

The Treasurer to the Authority is Mrs Becky Smeathers.

This Statement of Accounts is that upon which the auditor should enter his opinion and certificate. It presents a true and fair view of the financial position of the Authority at 31st March 2022 and its income and expenditure for the year then ended.

This Statement of Accounts is authorised for issue on 29th July 2022 by the Treasurer to the Authority. This is the date up to which events have been considered for recognition in the Statement of Accounts.

# INDEPENDENT AUDITOR'S REPORT TO THE MEMBERS OF NOTTINGHAMSHIRE STATEMENT OF ACCOUNTS 2021/22

Nottinghamshire and City of Nottingham Fire Authority - Statement of Accounts 2021/22

Nottinghamshire and City of Nottingham Fire Authority - Statement of Accounts 2021/22

# INTRODUCTION TO THE CORE STATEMENTS

# Movement in Reserves Statement - Page 20

This statement shows the movement in the year on the different reserves held by the Authority, analysed into 'usable reserves' (i.e. those that can not be applied to fund expenditure or reduce local taxation) and 'other reserves'. The Surplus or (Deficit) on the Provision of Services line shows the true economic cost of providing the Authority's services, more details of which are shown in the Comprehensive Income and Expenditure Statement. These are different from the statutory amounts required to be charged to the General Fund Balance for council tax setting purposes. The Net Increase/Decrease before Transfers to Earmarked Reserves line shows the statutory General Fund Balance before any discretionary transfers to or from earmarked reserves undertaken by the Authority.

# Comprehensive Income and Expenditure Statement - Page 23

This statement shows the accounting cost in the year of providing services in accordance with generally accepted accounting practices, rather than the amount to be funded from taxation. Authorities raise taxation to cover expenditure in accordance with regulations; this may be different from the accounting cost. The taxation position is shown in the Movement in Reserves Statement.

IAS 1 requires that where the Statement includes amounts in "Other Comprehensive Income and Expenditure" which will not be reclassified subsequently to the Surplus or Deficit on the Provision of Service as well as amounts which will be, then these two types of transactions should be shown separately on the face of the Statement. The Authority does not have transactions which will be reclassified subsequently to the Surplus or Deficit on the provision of Services, so the items in "Other Comprehensive Income and Expenditure" have not been separated in this way.

# Balance Sheet - Page 24

The Balance Sheet shows the value of the assets and liabilities recognised by the Authority as at the Balance Sheet date. The net assets of the Authority (assets less liabilities) are matched by the reserves held by the Authority. Reserves are reported in two categories. The first category of reserves are usable reserves, i.e. those reserves that the Authority may use to provide services, subject to the need to maintain a prudent level of reserves and any statutory limitations on their use (for example the Capital Receipts Reserve that may only be used to fund capital expenditure or repay debt). The second category of reserves is those that the Authority is not able to use to provide services. This category of reserves includes reserves that hold unrealised gains and losses (for example the Revaluation Reserve), where amounts would only become available to provide services if the assets are sold; and reserves that hold timing differences shown in the Movement in Reserves Statement line 'Adjustments between accounting basis and funding basis under regulations'.

# Cash Flow Statement - Page 25

The Cash Flow Statement shows the changes in cash and cash equivalents of the Authority during the reporting period. The statement shows how the Authority generates and uses cash and cash equivalents by classifying cash flows as operating, investing and financing activities. The amount of net cash flows arising from operating activities is a key indicator of the extent to which the operations of the Authority are funded by way of taxation and grant income or from the recipients of services provided by the Authority. Investing activities represent the extent to which cash outflows have been made for resources which are intended to contribute to the Authority's future service delivery. Cash flows arising from financing activities are useful in predicting claims on future cash flows by providers of capital (i.e. borrowing) to the Authority.

# **Expenditure and Funding Analysis - Page 22**

Whilst not a core statement, the Expenditure and Funding Analysis (EFA) demonstrates the relationship between the surplus or deficit on the provision of services in the Comprehensive Income and Expenditure Statement and the movement in the general fund balance shown in the Movement in Reserves Statement. The EFA shows how annual expenditure is used and funded from resources (government grants, council tax and business rates) by the Authority in comparison with those resources consumed or earned by the Authority in accordance with generally accepted accounting practices. It also shows how this expenditure is allocated for decision making purposes between the Authority's services and departments. Income and expenditure accounted for under generally accepted accounting practices is presented more fully in the Comprehensive Income and Expenditure Statement.

# NOTES TO THE CORE ACCOUNTING STATEMENTS

# 1. ACCOUNTING POLICIES

# **General Principles**

The Statement of Accounts summarises the Fire Authority's transactions for the 2021/22 financial year and its position at the year end of 31 March 2022. The Authority is required to prepare an annual Statement of Accounts by the Accounts and Audit (England) Regulations 2015 which those regulations require to be prepared in accordance with proper accounting practices. These practices primarily comprise the Code of Practice on Local Authority Accounting in the United Kingdom 2021/22 (the Code) and the Service Reporting Code of Practice 2020/21 supported by International Financial Reporting Standards (IFRS).

The accounting convention adopted is principally historical cost, modified by the revaluation of certain categories of non current assets and financial instruments. All figures in the Statement have been rounded to the nearest £1k, which may result in some discrepancies due to roundings.

# **Going Concern**

The concept of a going concern assumes that the functions of Nottinghamshire Fire and Rescue will continue in operational existence for the foreseeable future. The provisions in the Code in respect of going concern reporting requirements reflect the economic and statutory environment in which Fire and Rescue services operate. These provisions confirm that, as Fire and Rescue services cannot be created or dissolved without statutory prescription, they must prepare their financial statements on a going concern basis of accounting.

Fire and Rescue services carry out functions essential to the local community and are themselves revenue-raising bodies (with limits on their revenue-raising powers arising only at the discretion of central government). If a Fire Authority were in financial difficulty, the prospects are thus that alternative arrangements might be made by central government either for the continuation of the functions it provides or for assistance with the recovery of a deficit over more than one financial year. As a result of this, it would not therefore be appropriate for the financial statements to be provided on anything other than a going concern basis. The Statement of Accounts drawn up under the Code therefore assume that a Fire authority will continue to operate for the foreseeable future.

The Service undertook a limited amount of additional work during 2001/22 related to the Covid-19 pandemic. These costs were entirely met either from funding from our partner agencies or from Covid-19 grant received from Central Government

The service has been reliant on one off grants from the government to balance the budget both in 2020/21 and 2021/22. The budget papers presented to Fire Authority in February 2022 predicted a funding deficit in the region in excess of £2m in 2023/24 and beyond. Whilst both funding and costs are difficult to predict in the current financial climate, the service is anticipating that savings will need to be made. The Futures 25 Efficiency Strategy was approved at Policy and Strategy Committee in May 2022 and a further report will be presented to Fire Authority in September 2022 to identify areas where the likely savings can be made. These are expected to include both reductions in staff costs and non staff costs. Final proposals will be agreed once the funding position becomes clearer early in 2023.

The service has created earmarked reserves totalling £1.8m to support the Futures 25 Efficiency Strategy and to mitigate future budget pressures. It has also taken early action to reduce costs during 2022/23 by delaying recruitment and holding vacant posts. This both helps avoid any

The service recognises there is uncertainty over the longer term impact of Covid-19 resulting from a reduction in Council Tax and Business Rates funding. Any 2020/21 collection fund deficits were permitted to be repaid over 3 years rather than the normal 1 year. The Government have provided grant to cover Business Rate holidays and 75% of deficit figures. Estimates of both of these have been built into the revenue budget for 2021/22 to 2023/24. Final outturn figures were not significantly different to those in the 2021/22 budget and are not expected to cause any additional pressure.

Fire Authority approved its Medium Term Financial Strategy (MTFS) for 2021/22 to 2024/25 in November 2020. The final budget was approved by Fire Authority in February 2021. This explored a number of financial scenarios which demonstrate that the service has long term sustainability with sufficient reserves to manage any short term deficits.

The 2020/21 revenue underspend was used to fund £500k capital expenditure, which will have the impact of reducing future year borrowing costs, and £1.051m was transferred into Earmarked Reserves to cover future year expenditure. Useable Reserves were £10.7m at 31 March 2021. The General Fund balance of £5.0m remained above the £4.5m minimum level set in the Reserves Strategy. The minimum level had been increased from the previous year to take account of the impact of Covid-19.

Based upon the latest assumptions cash flow forecasts have been prepared out to the end of March 2023 which indicate the service will maintain a strong cash position.

Based on our assessment of the financial and liquidity position of Nottinghamshire Fire and Rescue Service following the Covid-19 outbreak, there are no material uncertainties or concerns on the basis of preparing the 2020/21 financial statements or on the ability to continue to operate as a going concern for a period of 12 months from the date of approval of these financial statements.

# **Accruals of Expenditure and Income**

Activity is accounted for in the year that it takes place, not simply when cash payments are made or received. This is known as the accruals basis. In particular:

- a) Supplies are recorded as expenditure when they are consumed. Some supplies are carried as Inventories on the balance sheet, where they are held in Stores prior to being distributed and used.
- b) Where goods are supplied to or by the Fire Authority in the financial year, but payment does not occur until the following financial year, a Short Term Creditor or Short Term Debtor for the relevant amount is shown on the Balance Sheet. Exceptions are made to this policy for certain recurring items that cover a specific period, e.g. quarterly energy bills. These items are brought into the accounts in the year they are paid and are not apportioned over the years to which they relate.

- c) Expenses in relation to services received (including services provided by employees) are recorded as expenditure when the services are received rather than when payments are made. However, due to a policy change which came into effect on 1 April 2017 an exception is now made to this policy for overtime payments and payments claimed in arrears by retained duty system staff. This expenditure is recognised in the year it is paid rather than the year in which the work was carried out.
- d) Fees and charges due from customers are recognised as income at the date the Fire Authority provides the relevant services. Debts outstanding at the year end are assessed for evidence of uncollectability based on past events and a charge is made to revenue where the total value of debts for which there is evidence of impairment exceeds a £5,000 de minimis threshold. The impairment is assessed using the Expected Credit Loss Model. This model uses a provision matrix and calculates a fixed provision rate based on the number of days that a receivable is past due, assessed on the basis of historical experience from the previous five years and adjusted (if necessary) to reflect current conditions and forecasts of future conditions.
  - Impairment loss allowances are not recognised for debts where the counterparty is central government or a local authority, as statutory provisions prevent default. This policy applies to debts from unpaid fees and charges council tax debtors are subject to a different policy (see below).
- e) Interest payable on borrowings and receivable on investments is accounted for on the basis of the effective interest rate for the relevant financial instrument rather than on the basis of cash flows determined by the contract.

# **Allocation of Support Service Costs**

Support services are provided primarily by the Authority itself although some are purchased directly from the constituent authorities. The provision of a Clerk to the Authority is purchased from Nottingham City Council and some limited financial services are provided by Nottinghamshire County Council and Leicestershire County Council.

The costs of overheads and support services are charged to service segments in accordance with the Authority's arrangements for accountability and financial performance.

# **Borrowing Costs**

Borrowing costs are recognised as an expense in the period in which they are incurred. Borrowing costs are interest and other costs incurred in connection with the borrowing of funds to finance the acquisition, creation or enhancement of non current assets.

# Cash and Cash Equivalents

Cash is represented by cash in hand and deposits with financial institutions repayable without penalty on notice of not more than twenty four hours. Cash equivalents are investments that mature in three months or less from the date of acquisition and that are readily convertible to known amounts of cash with insignificant risk of change in value.

In the Cash Flow Statement, cash and cash equivalents are shown net of bank overdrafts that are repayable on demand and form an integral part of the Authority's cash management.

# **Contingent Liabilities and Contingent Assets**

A contingent liability arises where an event has taken place that gives the authority a possible obligation whose existence will only be confirmed by the occurrence or otherwise of uncertain future events not wholly within the control of the Authority. Contingent liabilities also arise in circumstances where a provision would otherwise be made but either it is not probable that an outflow of resources will be required or the amount of the obligation cannot be measured reliably. Contingent liabilities are not recognised in the Balance Sheet but disclosed in a note to the accounts.

A contingent asset arises where an event has taken place that gives the authority a possible asset whose existence will only be confirmed by the occurrence or otherwise of uncertain future events not wholly within the control of the Authority. Contingent assets are not recognised in the Balance Sheet but disclosed in a note to the accounts where it is probable that there will be an inflow of economic benefits or service potential.

# **Council Tax Income and Non Domestic Rates**

Council tax and non domestic rates are collected from taxpayers by billing authorities both for themselves and substantively as agents, collecting council tax and non domestic rates on behalf of precepting authorities and central government and distributing it to them.

This authority is a precepting authority, and council tax and non domestic rates income included in the Comprehensive Income and Expenditure Statement is the accrued income for the year. The difference between the income included in the Comprehensive Income and Expenditure Statement and the amount required by regulation to be credited to the General Fund is taken to the Collection Fund Adjustment Account on the Balance Sheet and shown within the Movement in Reserves Statement.

Billing authorities prepare a Collection Fund balance sheet for council tax and non domestic rates activities, which is disaggregated and shared between the billing authority and its precepting authorities. This Authority's Balance Sheet contains the following items:

- a) Council tax and non domestic rates arrears apportioned in relation to the following year's precept proportions are included as Short Term Debtors
- b) Impairment allowance for doubtful debts apportioned as for council tax and non domestic rates arrears and deducted from council tax and non domestic rates arrears debtors
- c) Council tax and non domestic rates overpayments and prepayment apportioned in relation to the following year's precept proportions are included as Short Term Creditors
- d) Collection Fund surplus / deficit the reversing entry to the Comprehensive Income and Expenditure Account adjustment is included in the Collection Fund Adjustment Account
- e) Collection Fund cash surplus / deficit held on the authority's behalf by the billing authority is included in Short Term Debtors or Short Term Creditors

# **Employee Benefits**

# **Benefits Payable During Employment**

Short-term employee benefits are those due to be settled within 12 months of the year-end. They include such benefits as wages and salaries, paid annual leave and paid sick leave, bonuses and non-monetary benefits (e.g. cars) for current employees and are recognised as an expense for services in the year in which employees render service to the Authority. An accrual is made for the cost of holiday entitlements (or any form of leave, e.g. time off in lieu) earned by employees but not taken before the year-end which employees can carry forward into the next financial year. The accrual is made at the wage and salary rates applicable in the following accounting year, being the period in which the employee takes the benefit. The accrual is charged to Surplus or Deficit on the Provision of Services, but then reversed out through the Movement in Reserves Statement so that holiday benefits are charged to revenue in the financial year in which the holiday absence occurs.

### **Termination Benefits**

Termination benefits are amounts payable as a result of a decision by the Authority to terminate an officer's employment before the normal retirement date or an officer's decision to accept voluntary redundancy. They are charged on an accruals basis to the appropriate service when the Authority can no longer withdraw the offer of those benefits. Where termination benefits involve the enhancement of pensions, statutory provisions require the General Fund Balance to be charged with the amount payable by the Authority to the pension fund or pensioner in the year, not the amount calculated according to the relevant accounting standards. In the Movement in Reserves Statement, appropriations are required to and from the Pensions Reserve to remove the notional debits and credits for pension enhancement termination benefits and replace them with debits for the cash paid to the pension fund and pensioners and any such amounts payable but unpaid at the year-end.

# **Post Employment Benefits**

# Participation in Pension Schemes

As part of the terms and conditions of employment of its officers and other employees, the Authority offers retirement benefits. Although these benefits are not actually payable until the employees retire, the Authority has a commitment to make these payments in the future. This commitment needs to be disclosed at the time that the employees earn their future entitlement.

The Authority participates in five pension schemes, all of which are defined benefit schemes:

- The Local Government Pension Scheme (LGPS) is for administrative and support staff and is administered by Nottinghamshire County Council. This is a funded scheme, which means that contributions are paid into a fund with the intention of balancing pension liabilities with pension assets.
- The Firefighters' Pension Scheme 1992 has been closed to new entrants since 6 April 2006. Its members are wholetime firefighters. It is an unfunded pension scheme, meaning that there are no investment assets to meet the cost of pension liabilities and cash has to be generated to meet pension payments as they fall due. The cost of the scheme is met from contributions paid by employees and the Authority, with any deficit in the funding required being met by a top-up grant from the Home Office. Any surplus funding is paid over to the Home Office. Active members were transferred to the Firefighters's Pension Scheme 2015 on 1 April 2022.

- The Firefighters' Pension Scheme 2006 is also an unfunded pension scheme. This scheme came into being with effect from April 2006 and its members are retained firefighters and wholetime firefighters. Like the 1992 Scheme, the cost of the scheme is met from contributions paid by employees and the Authority, with any deficit in the funding required being met by a top-up grant from the Home Office and any surplus being paid over to them. The Firefighters' Pension Scheme (England)(Amendment) Order 2014 introduced a new modified version of the 2006 Scheme which is available to individuals who were employed as retained firefighters during the period 1 July 2000 to 5 April 2006. The modified version of the scheme has different benefits to the main 2006 Scheme. The 2006 Scheme has been closed to new entrants since April 2015 and active members were transferred to the Firefighters' Pension Scheme 2015 on 1 April 2002.
- The Firefighters' Pension Scheme 2015 came into effect on 1 April 2015. Like the 2006 and 1992 Schemes, the cost of the scheme is met from contributions paid by employees and the Authority, with any deficit in the funding required being met by a top-up grant from the Home Office and any surplus being paid over to them. Unlike the other firefighters' schemes, it is a career average rather than a final salary scheme. Its members are retained firefighters and wholetime firefighters who were first appointed by an English fire and rescue authority on or after 1 April 2015, and firefighters who were transferred from the 1992 or 2006 Schemes.
- The Firefighters' Compensation Scheme (England) Order 2006 makes provision for the
  payment of pensions, allowances and gratuities to and in respect of persons who die or are
  permanently disabled as a result of an injury sustained or disease contracted while employed by
  a fire and rescue authority. The Firefighter Compensation Scheme (FFCS) is treated as an
  unfunded defined benefit scheme. The cost of this scheme is met by the Authority.

The arrangements for the three Firefighters' pension schemes and the Firefighters' Compensation Scheme are determined by the Home Office. In order to identify the amount of top-up grant receivable from / surplus payable to the Home Office the Authority is required to produce separate Pension Fund Statements for the firefighters' pension schemes (excluding the Compensation Scheme, which is funded from the Authority's revenue budget). Additional accounting policies can be found in the notes to these statements.

The Authority is required by the CIPFA Code of Practice to account for pensions in accordance with International Accounting Standard 19 Employee Benefits (IAS 19). One of the objectives of IAS 19 is to ensure that an employer's financial statements reflect a liability when employees have provided services in exchange for benefits to be paid in the future.

All five pension schemes are accounted for as defined benefit schemes:

The liabilities of the LGPS and the firefighters' schemes are included in the Balance Sheet on an actuarial basis using the projected unit method - i.e. an assessment of the future payments that will be made in relation to retirement benefits earned to date be employees, based on assumptions about mortality rates, employee turnover rates etc, and estimates of projected earnings for current employees.

- Liabilities are discounted to their value at current prices, using discount rates of 2.6% and 2.8% for the LGPS and firefighters' schemes respectively. The discount rates for all schemes are based on the yields of AA-rated corporate bonds of currency and term appropriate to the currency and term of the scheme's liabilities.
- The assets of the LGPS pension fund attributable to the Authority are included in the Balance Sheet at their fair value:
  - · quoted securities current bid price
  - · unquoted securities professional estimate
  - · property market value

- The change in the net pensions liability is analysed into the following components:
  - · Service cost comprising:
    - Current service cost the increase in liabilities as a result of years of service earned this year. This is allocated in the Comprehensive Income and Expenditure Statement to the services for which the employee worked.
    - ➤ Past service cost the increase in liabilities as a result of a scheme amendment or curtailment whose effect relates to years of service earned in earlier years. This is debited to the Surplus or Deficit on the Provision of Services in the Comprehensive Income and Expenditure Statement.
  - Net interest on the net defined benefit liability, i.e. the net interest expense for the Authority - the change during the period in the net defined benefit liability that arises from the passage of time. This is charged to the Financing and Investment Income and Expenditure line of the Comprehensive Income and Expenditure Statement.
  - · Remeasurements comprising:
    - ➤ The return on plan assets excluding amounts included in net interest on the net defined benefit liability. This is charged to the Pensions Reserve as Other Comprehensive Income and Expenditure.
    - ➤ Actuarial gains and losses changes in the net pensions liability that arise because events have not coincided with assumptions made at the last actuarial valuation, or because the actuaries have updated their assumptions. This is charged to the Financing and Investment Income and Expenditure line of the Comprehensive Income and Expenditure Statement.
  - Contributions paid to the pension fund cash paid as employer's contributions to the pension funds in settlement of liabilities.

In relation to retirement benefits, statutory provisions require the General Fund Balance to be charged with the amount payable by the Authority to the pension fund or directly to pensioners in the year, not the amount calculated according to the relevant accounting standards. In the Movement in Reserves Statement, this means that there are transfers to and from the Pensions Reserve to remove the notional debits and credits for retirement benefits and replace them with debits for the cash paid to the pension fund and pensioners and any such amounts payable but unpaid at the year end. The negative balance that arises on the Pensions Reserve thereby measures the beneficial impact to the General Fund of being required to account for retirement benefits on the basis of cash flows rather than as benefits are earned by employees.

Further detail on post employment benefits accounting policies is given in note 39 to the core financial statements.

# **Discretionary Benefits**

The Authority also has restricted powers to make discretionary awards of retirement benefits in the event of early retirements. Any liabilities estimated to arise as a result of an award to any member of staff are accrued in the year of the decision to make the award and accounted for using the same policies as are applied to the Local Government Pension Scheme.

# **Events after the Reporting Period**

Events after the Balance Sheet date are those events, both favourable and unfavourable, that occur between the end of the reporting period and the date when the Statement of Accounts is authorised for issue. Two types of events can be identified:

- a) those that provide evidence of conditions that existed at the end of the reporting period the Statement of Accounts is adjusted to reflect such events
- b) those that are indicative of conditions that arose after the reporting period the Statement of Accounts is not adjusted to reflect such events, but where a category of events would have a material effect, disclosure is made in the notes of the nature of the events and their estimated financial effect.

Events taking place after the date of authorisation for issue are not reflected in the Statement of Accounts.

# **Exceptional Items**

When items of income or expense are material, their nature and amount is disclosed separately, either on the face of the Comprehensive Income and Expenditure Statement or in the notes to the accounts, depending on how significant the items are to an understanding of the Authority's financial performance.

# Financial Instruments

#### **Financial Liabilities**

Financial liabilities are recognised on the Balance Sheet when the Authority becomes a party to the contractual provisions of a financial instrument and are initially measured at fair value and carried at their amortised cost. The amortised cost will include any interest accrued and not paid as at the Balance Sheet date. Where the transaction costs of borrowing are immaterial and there is no premium or discount on borrowing and the interest rate is fixed for the loan term, then the actual interest rate has been used to calculate interest payable as this is the same as the effective interest rate. Annual charges to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement for interest payable are based on the carrying amount of the liability, multiplied by the effective rate of interest for the instrument.

# **Financial Assets**

Financial assets are classified based on a classification and measurement approach that reflects the business model for holding the financial assets and their cashflow characteristics. There are three main classes of financial assets measured at:

- · Amortised cost
- · Fair value through profit or loss
- Fair value through other comprehensive income

The Authority's business model is to hold investments to collect contractual cash flows. Financial assets are therefore classified as amortised cost, except for those whose contractual payments are not solely payment of principal of interest (i.e. where the cash flows do not take the form of a basic debt instrument).

Financial assets measured at amortised cost are recognised on the Balance Sheet when the Authority becomes a party to the contractual provisions of a financial instrument and are initially measured at fair value. They are subsequently measured at their amortised cost.

Annual credits to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement (CIES) for interest receivable are based on the carrying amount of the asset multiplied by the effective rate of interest for the instrument. For most of the financial assets held by the authority, this means that the amount presented in the Balance Sheet is the outstanding principal receivable (plus accrued interest) and interest credited to the CIES is the amount receivable for the year in the loan agreement.

### **Expected Credit Loss Model**

The Authority recognises expected credit losses on all of its financial assets held at amortised cost, either on a 12-month or lifetime basis. The recognition of an impairment in the CIES is subject to a collective de minimis threshold of £10k. The expected credit loss model also applies to lease receivables and contract assets. Only lifetime losses are recognised for trade receivables (debtors) held by the Authority.

Impairment losses are calculated to reflect the expectation that the future cash flows might not take place because the borrower could default on their obligations. Credit risk plays a crucial part in assessing losses. Where risk has increased significantly since an instrument was initially recognised, losses are assessed on a lifetime basis. Where risk has not increased significantly or remains low, losses are assessed on the basis of 12-month expected losses. Impairment loss allowances are not recognised for expected credit losses on a financial assets where the counterparty is central government or a local authority for which relevant statutory provisions prevent default.

### **Government Grants and Contributions (Revenue)**

Grants and contributions relating to revenue expenditure are accounted for on an accruals basis, when there is reasonable assurance that the grant or contribution will be received, and they are recognised immediately in the Comprehensive Income and Expenditure Statement as income, except to the extent that the grant or contribution has a condition that the Authority has not satisfied.

A condition requires the grant funder or donor to have a right to the return of their monies (or asset or similar equivalent compensation) if the Authority fails to meet a stipulation under the terms of the transfer. If there are conditions attached to grants and contributions:

where there is no reasonable assurance that the conditions will be met, the grant or contribution received is recorded in Cash and held on the Balance Sheet as a Creditor.

where there is reasonable assurance that the conditions will be met but this has not yet occurred, the grant or contribution is held in the Grants Receipts in Advance account as a liability on the Balance Sheet and recorded in Cash (if received) or Debtors (if receivable). When the conditions have been satisfied, the income will be credited to the Comprehensive Income and Expenditure Statement.

Revenue grants are matched in the Comprehensive Income and Expenditure Statement with the service expenditure to which they relate. Grants to cover general expenditure (e.g. Revenue Support Grant) are credited to Taxation and Non-Specific grant income within the Comprehensive Income and Expenditure Statement

# **Government Grants and Contributions (Capital)**

Grants and contributions relating to capital expenditure are accounted for on an accruals basis, when there is reasonable assurance that the grant or contribution will be received, and they are recognised immediately in the Comprehensive Income and Expenditure Statement as income, except to the extent that the grant or contribution has a condition that the Authority has not satisfied.

A condition requires the grant funder or donor to have a right to the return of their monies (or asset or similar equivalent compensation) if the Authority fails to meet a stipulation under the terms of the transfer. If there are conditions attached to grants and contributions:

- where a capital grant or contribution has been received and conditions remain outstanding at the Balance Sheet date, the grant or contribution is recorded in Cash and held in the Capital Grants Receipts in Advance account as a liability on the Balance Sheet. When the conditions have been satisfied, the income will be credited to Taxation and Non-Specific Grant Income within the Comprehensive Income and Expenditure Statement.
- where no conditions remain outstanding and expenditure has been incurred, the grant or contribution is transferred from the General Fund to the Capital Adjustment Account to reflect the application of capital resources to finance expenditure. This transfer is reported in the Movement in Reserves Statement.
- where no conditions remain outstanding and expenditure has not yet been incurred, the
  grant or contribution is transferred to the Capital Grants Unapplied Account to reflect its
  status as a capital resource available to finance expenditure. This transfer is reported in
  the Movement in Reserves Statement. When, at a future date, the expenditure to be
  financed is incurred the grant or contribution is transferred from the Capital Grants
  Unapplied Account to the Capital Adjustment Account to reflect the application of capital
  resources to finance expenditure. This transfer is reported in the Movement in Reserves
  Statement.

# **Inventories (Stocks)**

Inventories are included in the Balance Sheet at the lower of cost and net realisable value. The cost of inventories is assigned using the First In, First Out (FIFO) costing formula.

#### Leases

### Finance Leases (the Authority as Lessee)

The Fire Authority accounts for leases as finance leases when substantially all of the risks and rewards relating to the leased asset transfer to the Authority. Property, plant and equipment held under finance leases is recognised on the Balance Sheet at the commencement of the lease at its fair value measured at the lease's inception (or the present value of the minimum lease payments, if lower). The asset recognised is matched by a liability for the obligation to pay the lessor. Initial direct costs of the Authority are added to the carrying amount of the asset.

Lease rentals payable are apportioned between:

A charge for the acquisition of the interest in the asset (recognised as a liability in the balance sheet at the start of the lease, matched with a tangible fixed asset – the liability is written down as the rent becomes payable) and;

A finance charge (debited to the Financing and Investment Income and Expenditure line in the Comprehensive Income and Expenditure Statement as the rent becomes payable).

Non current assets recognised under finance leases are accounted for using the policies generally applied to such assets, subject to depreciation being charged over the lease term if this is shorter than the asset's estimated useful life. Finance charges are accounted for on a straight line basis over the term of the lease.

### Operating Leases (the Authority as Lessee)

Leases that do not meet the definition of finance leases are accounted for as operating leases. Rentals payable are charged to the Comprehensive Income and Expenditure Statement on a straight line basis over the term of the lease (unless the arrangement specifies a rental pattern which is not straight line, in which case this will be disclosed).

Arrangements that do not have the legal status of a lease but convey a right to use an asset in return for payment are accounted for under this policy where fulfilment of the arrangement is dependent on the use of specific assets, and where the costs are material.

### Operating Leases (the Authority as Lessor)

Income from operating leases is recognised in the Comprehensive Income and Expenditure Statement on a straight line basis over the term of the lease, with the exception of the lease relating to the property at Clifton. In this instance, as the annual payments vary, the income is recognised based on the specific cash flows as notated in the lease agreement.

### **Non Current Assets**

### **Property, Plant and Equipment**

Non current assets which have physical substance and are held for use in the provision of services or for administrative purposes on a continuing basis are classified as Property, Plant and Equipment.

#### Recognition

Expenditure on the acquisition, creation or enhancement of property, plant and equipment is capitalised on an accruals basis, provided that it yields benefits for more than one financial year. Expenditure on repairs and maintenance is charged as an expense when it is incurred.

### Measurement

The value of assets shown is subject to a £30,000 de minimis level. Assets with a value less than £30,000 will, however, be capitalised if they form part of a larger asset e.g. a piece of IT equipment which forms part of the IT infrastructure.

Assets are initially measured at cost, comprising the purchase price plus all expenditure directly attributable to bringing the asset to the location and condition for its intended use. Donated assets are measured initially at fair value with the difference between fair value and any consideration paid being credited to the Taxation and Non-Specific Grant Income line of the Comprehensive Income and Expenditure Statement, unless the donation has been made conditionally. Until conditions are satisfied, the gain is held on the Balance Sheet in the Donated Assets Account. Where gains are credited to the Comprehensive Income and Expenditure Statement, they are reversed out of the General Fund Balance to the Capital Adjustment Account in the Movement in Reserves Statement.

Assets are then carried in the balance sheet using the following measurement bases:

### Land and Buildings

These assets are classified as either operational or non operational and valued at current value in existing use, which is deemed to be the amount that would be paid for the asset in its existing use in an arm's-length transaction and disregarding potential alternative uses (Existing Use Value - EUV). Specialised, operational assets (e.g. Fire Stations) and specialised, non operational assets are valued at Depreciated Replacement Cost (DRC) which is a proxy for EUV and recognises that for specialised assets there is no market based evidence of fair value. Surplus assets are valued at Fair Value under IFRS. Non operational assets under construction are valued at historical cost. All assets are revalued every 5 years on a rolling basis by the Nottingham Valuation Office, or more if there have been material changes in value. All buildings are revalued subsequent to major refurbishment works being completed.

# Furniture and Fittings

Furniture and fittings which form part of major refurbishments are classed as non current assets and are shown in the balance sheet at depreciated historic cost.

# Vehicles and Plant

Vehicles and plant are classified as non current assets and are shown at a value which represents cost less depreciation charged on a straight line basis over the length of their useful lives.

# All other Assets

All other assets are shown in the Balance Sheet at a valuation which represents their cost less depreciation charged on a straight line basis over the length of their useful lives.

Increases in valuations are matched by credits to the Revaluation Reserve to recognise unrealised gains (although see section below: Revaluation and Impairment Losses). Where decreases in value and impairments are identified, they are accounted for by:

- a) Where there is a balance of revaluation gains for the asset in the Revaluation Reserve, the carrying amount of the asset is written down against that balance (up to the amount of the accumulated gains).
- b) where there is no balance in the Revaluation Reserve or an insufficient balance, the carrying amount of the asset is written down against the relevant service line(s) in the Comprehensive Income and Expenditure Statement.

The Revaluation Reserve contains revaluation gains recognised since 1 April 2007 only, the date of its formal implementation. Gains arising before that date have been consolidated into the Capital Adjustment Account.

Charges to Revenue for Non Current Assets

Services and support services are charged annually with the following amounts to record the real cost to the Authority of holding non current assets during the year:

- a) depreciation attributable to the assets used by the relevant service.
- b) revaluation and impairment losses on assets used by the service, where there are insufficient accumulated gains in the Revaluation Reserve balance for that asset against which the losses can be written off.
- c) amortisation of intangible non current assets attributable to the service.

The Authority is not required to raise council tax to cover these charges. It is, however, required to make an annual contribution from revenue towards the reduction in its overall borrowing requirement. This is known as the Minimum Revenue Provision (MRP) and the Authority's policy is to charge an amount of MRP equal to 4% of the Capital Financing Requirement relating to assets purchased on or before 31 March 2007 plus an amount of MRP calculated on the basis of asset lives relating to assets purchased on or after 1 April 2007. The charges listed in a) to c) above are replaced by a Minimum Revenue Provision charge, by way of an adjusting transaction with the Capital Adjustment Account in the Movement in Reserves Statement for the difference between the two.

#### **Depreciation and Amortisation**

Depreciation is provided for on non current assets with a determinable finite life by allocating the value of the asset in the Balance Sheet over the periods expected to benefit from their use.

Depreciation is calculated on the following bases:

- Buildings: straight line allocation over the remaining useful life as estimated by the Valuation Office
- IT and Communications Equipment: straight line allocation over estimated remaining useful life
- Land, assets under construction and assets held for sale: not depreciated
- Fire Appliances: straight line allocation over the estimated useful life
- Furniture and Fittings: 20% of the balance at the beginning of the financial year
- Intangible Non Current Assets (software): amortisation equal to straight line allocation over the useful life.

Part year depreciation is charged from the start of the month of acquisition. Where an item of property, plant and equipment has major components whose cost is significant in relation to the total cost of the item, the components are depreciated separately. The de minimis threshold for componentisation is a current net book value of £150k - individual assets with a value of less than £150k will be disregarded for componentisation. To be separately identified as a component, an element of an asset must meet the following criteria:

- have a cost of at least 20% of the cost of the overall asset and
- have a materially different useful life (at least 20% different) and/or
- have a different depreciation method that materially affects the amount charged

Revaluation gains are also depreciated, with an amount equal to the difference between current value depreciation charged on assets and the depreciation that would have been chargeable based on their historic cost being transferred each year from the Revaluation Reserve to the Capital Adjustment Account.

# Revaluation and Impairment Losses

Where the carrying amount of an item of property, plant and equipment is decreased as a result of a revaluation, the decrease is recognised in the Revaluation Reserve up to the credit balance existing in respect of that asset and thereafter in the Surplus or Deficit on Provision of Services.

Where the carrying amount of an item of property, plant and equipment is increased as a result of a revaluation, any impairment losses for that asset, which have been charged to the Surplus or Deficit on Provision of Services in previous years, shall be reversed in the current year as a credit to the Surplus or Deficit on Provision of Services. The balance of the revaluation increase is credited to the Revaluation Reserve, but this amount represents the difference between the revalued amount and what the carrying amount net of depreciation would have been if no impairment loss had occurred in previous years. This means that the previous impairment loss reversal may not reverse the full amount of the loss.

### Disposals and Non Current Assets Held for Sale

When it becomes probable that the carrying amount of an asset will be recovered principally through a sale transaction rather than through its continuing use, it is reclassified as an Asset Held for Sale. The asset is revalued immediately before reclassification and then carried at the lower of this amount and fair value less costs to sell. Where there is a subsequent decrease to fair value less costs to sell, the loss is posted to the Other Operating Expenditure line in the Comprehensive Income and Expenditure Statement. Gains in fair value are recognised only up to the amount of any previous losses recognised in the Surplus or Deficit on Provision of Services. Depreciation is not charged on Assets Held for Sale.

If assets no longer meet the criteria to be classified as Assets Held for Sale, they are reclassified back to non-current assets and valued at the lower of their carrying amount before they were classified as held for sale; adjusted for depreciation, amortisation or revaluations that would have been recognised had they not been classified as Held for Sale, and their recoverable amount at the date of the decision not to sell.

When an asset is disposed of or decommissioned, the value of the asset in the balance sheet is written off to the Other Operating Expenditure line in the Comprehensive Income and Expenditure Statement as part of the gain or loss on disposal. Amounts received from disposals are credited to the Usable Capital Receipts Reserve, which will then be used for new capital investment or set aside to reduce the borrowing requirement. Receipts are appropriated to the Reserve from the General Fund Balance in the Movement in Reserves Statement. Any accumulated balance of gains in the Revaluation Reserve, relating to an asset which has been disposed of, are written out to the Capital Adjustment Account.

When an existing building is demolished and replaced with a new build, the existing building would be treated as a disposal, the new building being added to Assets Under Construction at cost and then moved to Operational Buildings and revalued at Fair Value from the date it becomes operational.

The written-off value of disposals is not a charge against council tax, as the cost of non current assets is fully provided for under separate arrangements for capital financing. Amounts are appropriated to the Capital Adjustment Account from the General Fund Balance in the Movement in Reserves Statement

#### **Donated Assets**

Donated assets are defined as assets transferred at nil value or acquired at less than fair value. Donated assets from other public bodies which meet the definition of "government" in IAS 20 are accounted for as a government grant.

Donated assets are recognised immediately on receipt as Property, Plant and Equipment and are valued at fair value, which in this case is the amount for which the asset could be exchanged between knowledgeable, willing parties in an arm's-length transaction. The gain to the Authority on receipt of the asset is recognised as income in the relevant service line in the Comprehensive Income and Expenditure Statement. The exception to this is to the extent that the Authority has not met any conditions attached to the donated asset, the gain relating to the asset is recognised in the Donated Assets Account on the Balance Sheet. The income will subsequently be recognised in the Comprehensive Income and Expenditure Statement when the conditions of donation have been satisfied.

After initial recognition, donated assets are measured in accordance with the accounting policies for Property, Plant and Equipment.

# Re-classification of Assets Under Construction to Operational Assets

Assets under construction which are subsequently identified as being operational will be reclassified in the quarter following the date when the asset became operational.

### **Intangible Assets**

Intangible assets are identifiable, non financial, non current assets controlled by the Authority which do not have physical substance. This Authority has one type of intangible non current asset, which is software. Expenditure on the acquisition of intangible non current assets is capitalised on an accruals basis, provided that it yields benefits for more than one financial year.

The value of assets capitalised is subject to a £30,000 de minimis level. Assets with a value of less than £30,000 will, however, be capitalised if they form part of a larger asset e.g. an ICT project to implement a new system with both hardware and software. Where an asset incorporates both hardware and software, it will be classified as an intangible asset when the majority of the cost is attributable to software – otherwise it will be classified as Equipment within Property, Plant and Equipment.

Software is initially measured at cost and subsequently shown in the Balance Sheet at amortised historic cost. Amortisation is charged to the Comprehensive Income and Expenditure Account over the economic life of the asset. An asset is tested for impairment whenever there is an indication that the asset might be impaired – any losses recognised are charged to the relevant service line in the Comprehensive Income and Expenditure Statement. Any gain or loss arising on the disposal or abandonment of an intangible asset is posted to the Other Operating Expenditure line in the Comprehensive Income and Expenditure Statement.

# Prior Period Adjustments, Changes in Accounting Policies and Estimates and Errors

Prior period adjustments may arise as a result of a change in accounting policies or to correct a material error. Changes in accounting estimates are accounted for prospectively, i.e. in the current and future years affected by the change and do not give rise to a prior period adjustment. Changes in accounting policies are only made when required by proper accounting practices or the change provides more reliable or relevant information about the effect of transactions, other events and conditions on the Authority's financial position or financial performance. Where a change is made, it is applied retrospectively (unless stated otherwise) by adjusting opening balances and comparative amounts for the prior period as if the new policy had always been applied. Material errors discovered in prior period figures are corrected retrospectively by amending opening balances and comparative amounts for the prior period.

### **Provisions**

Provisions are made where an event has taken place which gives the Fire Authority an obligation that probably requires settlement by a transfer of economic benefits, but where the timing of the transfer is uncertain. Provisions are charged to the appropriate service line in the Comprehensive Income and Expenditure Statement when the authority becomes aware of the obligation, based on the best estimate of the likely settlement. When payments are eventually made, they are charged to the provision carried in the balance sheet. Estimated settlements are reviewed at the end of each financial year and a provision may then be reversed and credited back to the relevant service if the requirement has changed.

#### Reserves

The Fire Authority sets aside specific amounts as reserves for future policy purposes or to cover contingencies. Reserves are created by appropriating amounts out of the General Fund Balance in the Movement in Reserves Statement. When expenditure, to be financed from a reserve is incurred, it is charged to the appropriate service in that year in that year to score against the Cost of Services in the Comprehensive Income and Expenditure Statement. The reserve is then appropriated back into the General Fund Balance in the Movement in Reserves Statement so that there is no net charge against Council Tax for the expenditure.

Two useable reserves are shown on the face of the Balance Sheet. These are:

### General Reserve

This reserve is the surplus or deficit of income over expenditure in the 2021/22 financial year, and the cumulative effect of such surpluses or deficits carried forward from previous years. See note 24.

### Earmarked Reserve

This reserve contains funds built up to meet expected liabilities. The movement of this reserve is shown in note 11.

### **Capital Reserves**

There are four capital related reserves shown in the Balance Sheet. Of these four reserves the Useable Capital Receipts Reserve and the Capital Grants Unapplied Reserve are cash backed; the remaining two are non cash backed.

# The Revaluation Reserve

This represents the total of all fixed asset revaluation gains since 1 April 2007, less any revaluation losses since 1 April 2007 which have been offset against prior revaluation gains for the same asset.

# The Capital Adjustment Account

This account is credited with amounts set aside to finance capital expenditure and absorbs any timing differences between the setting aside of resources and accounting for depreciation and impairment losses. This reserve was created on 1 April 2007, replacing the Capital Financing Account. Its opening balance was an amalgamation of the closing balances as at 31 March 2007 of the Fixed Asset Restatement Account and the Capital Financing Account.

### The Useable Capital Receipts Reserve

This reserve is credited with the disposal proceeds when fixed assets are sold. It is ring fenced for supporting new capital expenditure or for reducing the underlying need to borrow against the capital financing requirement.

### The Capital Grants Unapplied Reserve

This reserve is credited with capital grants received, which have yet to be used to finance capital expenditure.

Movements on these reserves are shown in notes 24 and 25.

#### **Pensions Reserve**

This reserve represents the full future pensions liabilities at the time that these liabilities are earned by employees. An independent actuary assesses the liabilities for pension schemes in which the Authority participates, namely the Firefighters' Pension Schemes and the Local Government Pension Scheme.

### **Accumulated Absences Adjustment Account**

This reserve absorbs the differences that would otherwise arise on the General Fund balance from accruing for accumulated absences earned but not taken in the year.

### **Collection Fund Adjustment Account**

This reserve manages the differences arising from the recognition of council tax income in the Comprehensive Income and Expenditure Statement as it falls due from council tax payers, compared with the statutory arrangements for paying across amounts due to the General Fund from the billing authorities.

# Value Added Tax

VAT payable is included as an expense only to the extent that it is not recoverable from Her Majesty's Revenue and Customs. VAT receivable is excluded from income.

# 2. ACCOUNTING STANDARDS ISSUED, NOT ADOPTED

The Code of Practice requires the disclosure of the impact of an accounting change arising from a new accounting standard which has been issued but not yet adopted by the Code for the relevant financial year.

The standards introduced by the 2022/23 Code of Practice and relevant for additional disclosures that will be required in the 2021/22 financial statements in accordance with the requirements of the Code are:

IFRS 16 leases

The new accounting standard covering leases, IFRS 16 - Leases, has been deferred to be adopted in the 2021/22 Code with effect from 1st April 2024. This new standard will bring almost all leases onto an entity's balance sheet. As a result, some contractual payments that the Authority currently recognises as revenue expenditure could instead be recognised as an asset with a corresponding lease liability. However, both the 2022/23 and the 2023/24 Codes will allow for adoption should an authority consider that it is able to do so as at 1 April 2022 or 2023.

The change would not impact significantly on the Authority's accounts for 2021/22.

### 3. CRITICAL JUDGEMENTS IN APPLYING ACCOUNTING POLICIES

In applying the accounting policies set out in Note 1, the Authority has had to make certain judgements about complex transactions or those involving uncertainty about future events. The critical judgements made in the Statement of Accounts are:

The Government will provided indicative settlement figures for future years as part of the funding settlement in Autumn 2021. There remains the possibility that funding for local government organisations will be further reduced. Despite this there is no indication that the assets of the Authority might be impaired as a result of a need to close facilities and reduce levels of service provision. The Authority has a balanced budget for 2022/23 and is anticipating to contain spending within this budget. The Authority is in a good financial position to allow it to properly plan for any reductions in budgets over the next three years should this be required.

The Authority has valued its Fire Stations at depreciated replacement cost, as there is no market based evidence of fair value due to the specialised nature of the assets.

# ASSUMPTIONS MADE ABOUT THE FUTURE AND OTHER MAJOR SOURCES OF **ESTIMATION UNCERTAINTY**

The Statement of Accounts contains estimated figures that are based on assumptions made by the Authority about the future or that which are otherwise uncertain. Estimates are made taking into account historical experience, current trends and other relevant factors. However, because balances cannot be determined with certainty, actual results could be materially different from the assumptions and estimates.

The items in the Authority's Balance Sheet at 31 March 2022 for which there is a significant risk of material adjustment in the forthcoming year are as follows:

### Item

#### **Uncertainties**

# **Effect if Actual Results Differ from Assumptions**

Property, Plant and Equipment Assets are depreciated over useful lives that are dependent on assumptions about the level of repairs and maintenance that will be incurred amount of the assets falls. in relation to individual assets. The current economic climate makes it uncertain that the Authority will be able to sustain its current spending on repairs and maintenance, bringing into doubt the useful lives assigned to assets.

If the useful life of assets is reduced, depreciation increases and the carrying

It is estimated that the annual depreciation charge for buildings would increase by £116k for every year that useful lives had to be reduced.

### Item

### **Uncertainties**

Pensions Liability Estimation of the net liability to pay pensions depends on a number of complex judgements relating to the discount rate used, the rate at which salaries are projected to increase, changes in retirement ages, mortality rates and used is included in note 39 expected returns on pension fund assets. A firm of consulting actuaries is engaged to provide the Authority with expert advice about the assumptions to be applied.

# **Effect if Actual Results Differ from Assumptions**

The effects on the net pensions liability of changes in individual assumptions can be measured. A sensitivity analysis showing the impacts of changes in the discount rates

This list does not include assets and liabilities that are carried at fair value based on a recently observed market price.

# 5. MATERIAL ITEMS OF INCOME AND EXPENSE

Within the Comprehensive Income and Expenditure Statement are a number of material items of income and expense in Net Cost of Services which are not disclosed separately. These are as follows:

			Income or	
2	020/21	Description of Item	Expense	2021/22
	£000			£000
	3,596	Depreciation and Amortisation of Non Current Assets	Expense	3,476
	(235)	Capital Receipt Reversal of unused provision for	Income	(473)
	(155)	Officers Car Leasing	Income	0

# 6. EVENTS AFTER THE BALANCE SHEET DATE

The Statement of Accounts was authorised for issue by the Treasurer to the Authority on 29 July 2022. Events taking place after this date are not reflected in the financial statements or notes. Where events taking place before this date provided information about conditions existing at 31 March 2022, the figures in the financial statements and notes have been adjusted in all material respects to reflect the impact of this information.

# 10. <u>ADJUSTMENTS BETWEEN ACCOUNTING BASIS AND FUNDING BASIS UNDER REGULATIONS</u>

This note details the adjustments that are made to the total comprehensive income and expenditure recognised by the Authority in the year in accordance with proper accounting practice to the resources that are specified by statutory provisions as being available to the Authority to meet future capital and revenue expenditure.

The following sets out a description of the reserves that the adjustments are made against.

#### **General Fund Balance**

The General Fund is the statutory fund into which all the receipts of an authority are required to be paid and out of which all liabilities of the authority are to be met, except to the extent that statutory rules might provide otherwise. These rules can also specify the financial year in which liabilities and payments should impact on the General Fund balance, which is not necessarily in accordance with proper accounting practice. The General Fund balance therefore summarises the resources that the Authority is statutorily empowered to spend on its services or on capital investment (or the deficit of resources that the Authority is required to recover) at the end of the financial year.

### **Capital Receipts Reserve**

The Capital Receipts Reserve holds the proceeds from the disposal of land or other assets, which are restricted by statute from being used other than to fund new capital expenditure or to be set aside to finance historical capital expenditure. The balance on the reserve shows the resources that have yet to be applied for these purposes at the year-end.

### **Capital Grants Unapplied**

The Capital Grants Unapplied Account holds the grants and contributions received towards capital projects for which the Authority has met the conditions that would otherwise require repayment of the monies but which have yet to be applied to meet expenditure. The balance is restricted by grant terms as to the capital expenditure against which it can be applied and/or the financial year in which this can take place.

# **Useable Reserves**

	2020/21				2021/22

# **Capital Commitments**

At 31 March 2022 the Authority had entered into a number of contracts for the construction or enhancement of Property, Plant and Equipment in 2021/22 and future years, budgeted to cost £255k. Similar commitments at 31 March 2021 were £19k. The major commitment for 2021/22 is:

Worksop Fire Station

£255k

### Revaluations

The Authority carries out a rolling programme that ensures that all Property, Plant and Equipment required to be measured at fair value is revalued at least every five years. All valuations are carried out by the Valuation Office, the last valuation took place on the 31 March 2022, covering 12 properties via an inspection, 16 by applying a tender price index, and carried out by Aimee Eliis MRICS. Valuations of and buildings were carried out in accordance with the methodologies and bases for estimation set out in the professional standards of the Royal Institute of Chartered Surveyors.

The basis of valuation for various types of property is given in Accounting Policies Note 1.

The following table shows the progress of the Authority's rolling programme for the revaluation of non-current assets.

	Other Land &	Vehicles, Plant,	Assets under	Surplue	Assets Held for	
	Buildings £000	Equipment £000	Construction £000	Assets £000	Sale £000	Total £000

# 17 FINANCIAL INSTRUMENTS

The following categories of financial instrument are carried in the Balance Sheet:

31 March 2021 31 March 2022

Non-current (	Current		Non-current	Current
£000	£000	•	£000	£000
		Financial assets		
0	3,553	Investments measured at amortised cost	0	2,061
		Cash & cash equivalents measured at		
0	4,922	amortised cost	0	7,687
498	4,266	Debtors measured at cost	284	5,311
		Financial assets measured at fair value through		
0	0	profit or loss	0	0
		Financial assets measured at fair value through		
0	0	other comprehensive income	0	0
498	12,741	Total financial assets	284	15,059
		Financial liabilities		
(26,905)	(63)	Loans measured at amortised cost	(32,900)	(52)
(100)	, ,	Creditors measured at cost	(82)	(4,162)
Ò	,	Financial liabilities measured at fair value	Ó	Ó
(27,005)	(4,363)	Total financial liabilities	(32,982)	(4,214)

Note: the figures for debtors and creditors in the above table include grant receipts in advance but exclude Council Tax and Non Domestic Rates (NDR) debtors and creditors because Council Tax is a statutory debt not arising from a contract and therefore falls outside the scope of financial instruments. The table below provides a reconciliation between the figures in the above table and those on the Balance Sheet.

Short term debtors and creditors are carried at cost rather than amortised cost as this is a fair approximation of their value.

The values for financial instruments in the above table, and on the Balance Sheet, are all gross figures i.e. no netting of financial instruments has taken place.

31 March 2021		31 March 2022
£000	- -	£000
	Current Debtors	
5,335	Debtors - as shown on Balance Sheet	6,470
(1,069)	Less: Council Tax and NDR debtors	(1,159)

829	0	Interest expense	850	0

### Fair Value of Financial Assets and Financial Liabilities

The fair value of financial instruments has been determined by calculating the net present value (NPV) of future cashflows. The discount rates used in the NPV calculations are equivalent to the current rates in relation to the same or similar instruments of the same remaining duration from comparable lenders on the date of the valuation. A more detailed explanation of the rates used is given below. Short-term debtors and creditors are carried at cost as this is a fair approximation of their value.

The fair value of Public Works Loan Board (PWLB) loans of £29.6m is based on new PWLB borrowing rates. This fair value measures the economic effect of the terms agreed with the PWLB compared with estimates of the terms that would be offered for new PWLB loans undertaken at the balance sheet date. The difference between the carrying value and the fair value measures the additional interest that the authority will pay over the remaining terms of the loans under the agreements with the PWLB, against what would be paid if the loans were at prevailing PWLB rates.

The Authority also has the ability to prematurely repay its PWLB loans, however the PWLB would raise a penalty charge for early redemption in addition to charging a premium for the additional interest that would not be paid. The fair value of PWLB loans calculated using premature repayment rates is £35.2m. This fair value is £5.6m higher than that calculated using the PWLB new loans rates because the discount rate is lower and hence the premium payable would be higher.

There have been limited trades in the Lender Option Borrower Option (LOBO) market during the financial year ended 31 March 2022, so comparable market rates are not available. A proxy LOBO new loans rate has been derived by applying a margin of 80 basis points above the corresponding gilt rates. The fair value of the non-PWLB LOBO loan calculated using PWLB premature repayment rates as a market illustration is £8.1m. This fair value is £2.0m higher than that calculated using new loan rates (£6.1m) because the discount rate is lower and hence the premium payable would be higher.

31 Marcl	h 2021		31 March 2022		
Carrying	Fair		Carrying	Fair	
Amount	Value		Amount	Value	
£000	£000	Financial Liabilities at	£000	£000	
		amortised cost			
(22,959)	(26,193)	- PWLB Loans	(28,940)	(29,581)	
(4,010)	(6,847)	- Other Loans	(4,011)	(6,102)	

The fair value of borrowings is higher than the carrying amount because the Authority's portfolio of loans includes a number of fixed rate loans where the interest payable is higher than the prevailing rates at the Balance Sheet date. This shows a notional future loss (based on economic conditions at 31 March 2022) arising from a commitment to pay interest to lenders above current market rates.

31 March 2021				31 March 2022		
	Carrying	Fair		Carrying	Fair	
	Amount	Value		Amount	Value	
	£000	£000	_	£000	£000	
			Investments held at			
	3,553	3,553	amortised cost	2,061	2,061	
			Cash and cash equivalents			
	4,922	4,922	held at amortised cost	7,687	7,687	

All of the investments and cash equivalents held by the Authority have a maturity of less than 12 months. The carrying value is therefore taken to be a reasonable approximation of the fair value.

The 2021/22 CIPFA Accounting Code of Practice ("the Code") requires authorities to maximise the use of relevant observable inputs and minimise the use of unobservable inputs when measuring fair value. To achieve this objective, authorities are required to follow a fair value hierarchy, which categorises the inputs to valuation techniques used to measure fair value into three levels as follows:

- Level 1 inputs quoted prices (unadjusted) in active markets for identical assets or liabilities that an authority can access at the measurement date.
- Level 2 inputs inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly or indirectly.
- · Level 3 inputs unobservable inputs for the asset or liability.

# Fair value hierarchy for financial assets and financial liabilities that are not measured at fair value in the Balance Sheet

# 31 March 2022

Recurring fair value measurements using:	Quoted prices in active markets for identical assets (Level 1)	Other significant observable inputs (Level 2)	Significant unobservable inputs (Level 3)	Total £100
	£100	£100	£100	£100
Financial liabilities Loans held at amortised cost Financial assets	0	(35,683)	0	(35,683)
Investments, cash & cash equivalents held at amortised cost <b>Total</b>	0	-, -	0	9,748 <b>(25,935)</b>

# 31 March 2021 Comparative Year

Recurring fair value measurements using:	Quoted prices in active markets for identical assets (Level 1)	Other significant observable inputs (Level 2)	Significant unobservable inputs (Level 3)	Total £100
	£100	£100	£100	£100
Financial liabilities				
Loans held at amortised cost Financial assets	0	(33,040)	0	(33,040)
Investments, cash & cash				
equivalents held at amortised cost	0			8,475
Total	0	(24,565)	0	(24,565)

The fair value for financial liabilities and financial assets that are not measured at fair value included in level 2 in the previous table have been arrived at using a discounted cash flow analysis with the most significant inputs being the discount rate.

The fair value for financial liabilities and financial assets that are not measured at fair value can be assessed by calculating the present value of cash flows that will take place over the remaining term of the instruments, using the following assumptions:

Financial assets	Financial liabilities
<ul> <li>no early repayment or impairment is recognised</li> <li>estimated ranges of interest rates as 31 March 2022 of 0.00% to 0.55% for short term investments and cash equivalents, based on new lending rates for equivalent assets at that date</li> <li>the fair value of trade and other receivables is taken to be the invoiced or billed amount</li> </ul>	<ul> <li>no early repayment is recognised</li> <li>estimated ranges of interest rates at 31 March 2022 of 1.97% to 2.65% for loans payable based on new lending rates for equivalent loans at that date</li> </ul>

# Officers Car Leasing

A tax review identified that some travel related expenses have been incorrectly treated for tax purposes. These expenses are now being correctly taxed, and negotiations have concluded with Her Majesties Customs and Excise (HMRC) relating to outstanding VAT. A provision had been created to cover the costs which are estimated to be in the region of £70k, the figure agreed was £32.6k and this was used in 2021/22. £37.3k was written back in 2021/22.

# **III Heath & Legal Costs**

The service is currently subject to two litigation cases lodged at the High Court, relating to the national age discrimination claim, McCloud. The claimants are seeking damages relating to ill health pensions. Legal cost to cover this were expected to be in the region on £50K and the III Health cost were expected to be £85k short term and £43k long term, both of these were used in 2021/22. A further provision was made for the short term III health of £43k

### **Non Domestic Rates Appeals**

From 2013/14, a proportion of Non Domestic Rates collected by Nottinghamshire collecting authorities is retained locally, rather than paid directly to central government. Part of these retained rates are collected on behalf of NFRS, and so a portion of any related provisions must now be recognised by NFRS. This provision allows for possible losses arising from any successful appeals of business premises rateable values in 2021/22.

### **24 USEABLE RESERVES**

Useable reserves contain resources which the Authority can apply to the provision of services, either by incurring expenditure or by undertaking capital investment

31 March 2021		31 March 2022
£000		£000
4,991	General Fund	5,191
5,710	Earmarked Reserves	4,853
0	Capital Receipts Reserve	0
347	Capital Grants Unapplied	331_
11,048	Total Useable Reserves	10,375

# **General Fund**

The General Fund reserve contains accumulated surplus funds which have arisen either as a result of general underspending against the revenue budget or as a result of decisions to transfer revenue resources to the General Fund reserve. This reserve contains resources which could be used to fund any future unforeseen and unbudgeted significant expenditure.

2020/21		2021/22
£000		£000
4,990	Balance at 1 April	4,991
950	Transfer (to)/from General Fund Reserve	(657)
(949)	Transfer from General Fund Reserve to	857
	Earmarked Reserves	
4,991	Balance at 31 March	5,191

### **Earmarked Reserves**

Earmarked Reserves contain resources set aside for specific purposes such as future projects. The reserves are created by appropriating amounts out of the General Fund Balance (shown in the Movement in Reserves Statement). When expenditure to be financed from an earmarked reserve is incurred, it is charged to the appropriate service in that year to score against the Surplus or Deficit on the Provision of Services in the Comprehensive Income and Expenditure Statement. The reserve is then appropriated back into the General Fund Balance in the Movement in Reserves Statement so that there is no net charge against council tax for the expenditure.

2020/21		2021/22

(1,899)	Collection Fund Adjustment Account	(822)
(294)	Accumulated Absences Account	(268)
(631,177)	Total Unuseable Reserves	(595,516)

# **Revaluation Reserve**

The Revaluation Reserve contains the gains made by the Authority arising from increases in the value of its Property, Plant and Equipment and Intangible Assets. The balance is reduced when assets with accumulated gains are:

- · Re-valued downwards or impaired and the gains are lost
- · Used in the provision of services and the gains are consumed through depreciation, or
- · Disposed of and the gains are realised.

The Reserve contains only revaluation gains accumulated since 1 April 2007, the date that the Reserve was created. Accumulated gains arising before that date are consolidated into the balance on the Capital Adjustment Account.

2020/21 £000 22,488	Balance at 1 April	2021/22 £000 23,365

(61) (705)	Accumulated gains on assets disposed of Amount written off to the Capital Adjustment Account	(240) (900)
23,365	Balance at 31 March	25,537

# **Capital Adjustment Account**

The Capital Adjustment Account absorbs the timing differences arising from the different arrangements for accounting for the consumption of non-current assets and for financing the acquisition, construction or enhancement of those assets under statutory provisions. The Account is debited with the cost of acquisition, construction or enhancement as depreciation, impairment losses and amortisations are charged to the Comprehensive Income and Expenditure Statement (with reconciling postings from the Revaluation Reserve to convert fair value figures to historical cost basis). The Account is credited with the amounts set aside by the Authority as finance for the costs of acquisition, construction and enhancement.

The Account contains gains recognised on donated assets that have yet to be consumed by the Authority, and also contains revaluation gains accumulated on Property, Plant and Equipment before April 2007, the date that the Revaluation Reserve was created to hold such gains.

**Note 8** provides details of the source of all the transactions posted to the Account, apart from those involving the Revaluation Reserve.

### **Pension Reserve**

The Pensions Reserve absorbs the timing differences arising from the different arrangements for accounting for post employment benefits and for funding benefits in accordance with statutory provisions. The Authority accounts for post employment benefits in the Comprehensive Income and Expenditure Statement (CIES) as the benefits are earned by employees accruing years of service, updating the liabilities recognised to reflect inflation, changing assumptions and investment returns on any resources set aside to meet the costs. However, statutory arrangements require benefits earned to be financed as the Authority makes employer's contributions to pension funds or eventually pays any pensions for which it is directly responsible. The debit balance on the Pensions Reserve therefore shows a substantial shortfall in the benefits earned by past and current employees and the resources the Authority has set aside to meet them. The statutory arrangements will ensure that funding will have been set aside by the time the benefits come to be paid.

### **Collection Fund Adjustment Account**

The Collection Fund Adjustment Account manages the differences arising from the recognition of council tax and non-domestic rates income in the Comprehensive Income and Expenditure Statement as it falls due from council tax payers and business rates payers compared with the statutory arrangements for paying across amounts to the General Fund from the Collection Fund.

2020/21		2021/22

(1,899)	Balance at 31 March	(822)

# **Accumulated Absences Adjustment Account**

The Accumulated Absences Adjustment Account absorbs the differences that would otherwise arise on the General Fund Balance from accruing for compensated absences earned but not taken in the year e.g. annual leave entitlement carried forward at 31 March. Statutory arrangements require that the impact on the General Fund Balance is neutralised by transfers to or from the Account.

#### **30 POOLED BUDGETS**

The Authority has a pooled budget arrangement with the Local Resilience Forum, which is a multiagency project for planning and coordinating response to major incidents. This forum involves various public bodies from the Nottinghamshire area including Health Bodies and Local Government Authorities.

The Authority has a pooled budget arrangement for the Multi-Agency Coordination Centre, which is a premise at which a coordinated response to major incidents can be managed. Various Nottinghamshire public bodies, including Health Bodies, Local Government, and Police Authorities are parties to this arrangement.

## **33 EXTERNAL AUDIT COSTS**

The Authority has incurred the following costs in relation to the audit of the Statement of Accounts, statutory inspections provided by the Authority's external auditors and other services provided by the Authority's external auditors.

2020/21 £000		2021/22 £000
	Fees payable with regard to external audit services	
37	carried out by the appointed auditor for the year	24
37	Total	24

# **34 GRANT INCOME**

The Authority credited the following grants, contributions and donations to the Net Cost of Services in the Comprehensive Income and Expenditure Statement. Other grants have been credited to Taxation and Non-Specific Grant Income in the Comprehensive Income and Expenditure Statement. These grants are detailed in note 14.

2020/21		2021/22
£000		£000
	Credited to Services	
(420)	Firelink grant (part of the Fire Revenue grant DCLG)	(369)
(80)	New Dimension grant (part of the Fire Revenue grant DCLG)	(81)
	New Risk Programme	
	Enhanced Logistical Support	
	Control Room Research	
(29)	New Risks grant	(55)
0	Emergency Services Mobile Communications grant	(77)
(19)	Fire Protection and Recognised prior learning Grant	0
(60)	Fire Protection Building Risk Review Grant	0
(92)	Fire Protection Protection Uplift Grant	(165)
, ,	Apprenticeship Levy	(215)
(101)	Grenfell infrastructure Grant	0
0	Pension admin Grant	(125)
0	Rise in Audit fees Grant	(12)
(935)	Total	(1,099)

The Authority has received a number of grants, contributions and donations that have yet to be recognised as income because they have conditions attached to them that will require the monies or property to be returned to the giver if the conditions are not met. The balances at the year-end are as follows:

31 March 2021	31 March 2022
£000	£000
Grants Receipts in Advance (Revenue G	rants)
(68) Local Resilience Forum	(68)
(14) Multi Agency Coordination Centre	(14)
(82) Total	(82)

As these balances are expected to be held for more than 12 months they have been categorised as non-current liabilities on the 2021/22 balance sheet.

#### **35 RELATED PARTIES**

The Authority is required to disclose material transactions with related parties, which are bodies or individuals that have the potential to control or influence the Authority or to be controlled or influenced by the Authority. Disclosure of these transactions allows readers to assess the extent to which the Authority might have been constrained in its ability to operate independently or might have secured the ability to limit another party's ability to bargain freely with the Authority.

#### **Central Government**

Central government has significant influence over the general operations of the Authority. It is responsible for providing the statutory framework within which the Authority operates, provides the majority of its funding in the form of grants and prescribes the terms of many of the transactions that the Authority has with other parties (e.g. council tax bills). Grants received from government departments are set out in the analysis in Note 34 and Note 14.

#### Members

Members of the Authority have direct control over the Authority's financial and operating policies. Details of members' allowances and expenses are shown in Note 31.

## **Officers**

Some senior employees have significant influence over the Authority's activities. Details of senior officers' remuneration are shown in Note 32.

# **Nottinghamshire County Council and Nottingham City Council**

The Authority is made up of 12 members from Nottinghamshire County Council and 6 members from Nottingham City Council, and so a related party relationship exists between the Authority and these Councils by way of common control. Significant transactions are detailed below, and include expenditure on cleaning and maintenance services and income from partnership working. The Police and Crime Commissioner attends the Combined Fire Authority meetings in a non voting capacity.

Nottinghamahira

	Nottingh County			ngham Council	Police & Crime Commissioner		
	2020/21 £000	2021/22 £000	2020/21 £000	2021/22 £000	2020/21 £000	2021/22 £000	
Expenditure during year Income during	585	590	95	126	1,011	1,901

Creditor at 31 March Debtor at 31	0	31	0	49	126	126	
March	49	0	0	7	35	14	

#### **Other Public Bodies**

Some members of the Authority are also members of other local Borough or District Councils in Nottinghamshire. Other public bodies such as Fire Authorities are subject to varying degrees of common control or significant influence by central government. The Authority carries out transactions with such bodies from time to time, including income and expenditure from the provision of goods or services, partnership working and pooled budgets, including transactions at other than commercial value. Note that council tax receipts from collecting authorities and transactions with tax authorities are considered to be agency arrangements, and do not qualify as related party relationships.

## 36 CAPITAL EXPENDITURE AND CAPITAL FINANCING

The total amount of capital expenditure incurred in the year is shown in the table below, together with the resources that have been used to finance it. Where capital expenditure is to be financed in future years by charges to revenue as assets are used by the Authority, the expenditure results in an increase in the Capital Financing Requirement (CFR), a measure of the capital expenditure incurred historically by the Authority that has yet to be financed. The change in the CFR is analysed in the second part of this note.

2020/21 £000		2021/22 £000
26,017	Opening Capital Financing Requirement	26,667
0	Capital receipt not applied in year  Capital Investment	0
1,868	Property, Plant and Equipment - (Operational and under Construction)	5,375
1,267	Property, Plant and Equipment - (Non Operational)	1,037
115	Intangible Assets (including under construction)	82
	Sources of Finance	
(235)	Capital Receipts	(472)
Ò	Government grant and other contributions	`(16)
	Sums set aside from revenue:	, ,
(691)	Direct revenue contributions	(528)
(1,674)	Minimum / Voluntary Revenue Provision	(1,551)
26,667	Closing Capital Financing requirements	30,594

#### **37 LEASES**

#### **Authority as Lessee**

The Authority currently has no assets which would be defined as assets subject to operating lease arrangements. This was also the case in 2020/21.

## **Authority as Lessor**

#### **Operating Leases**

The Authority has entered into an operating lease arrangement with Nottinghamshire Police in respect of two of its properties, one property is currently not required for operational purposes. Annual rentals are varied therefore the straight line method of accounting for rental income to the Comprehensive Income and Expenditure Statement, is not used. (See item in the Statement of Accounting Policies - Note 1). Rent received in 2020/21 £43k and 2021/22 £65k

# Future contracted receipts are:

·	£000
Within 1 year	59
Within 2 to 5 years	72
Over 5 years	0

The lease for property not currently used for operational purposes expires 2022/23.

## **38 TERMINATION BENEFITS**

In 2021/22 the Authority has funded termination benefits totalling £71k from its revenue budget. Termination benefits have been received by 5 individuals

#### **39 DEFINED BENEFIT PENSION SCHEMES**

## **Participation in Pension Schemes**

As part of the terms and conditions of employment of its officers, the Authority makes contributions towards the cost of post-employment benefits. Although these benefits will not actually be payable until employees retire, the Authority has a commitment to make these payments in the future.

As at 31 March 2022 the Authority participates in four post-employment schemes, all of which are defined benefit schemes:

# 1) The Local Government Pension Scheme (LGPS)

This scheme is for administrative, support and Control employees. It is a funded scheme, which means that contributions are paid into a fund with the intention of balancing pension liabilities with pension assets. It is administered in accordance with the Local Government Pension Scheme Regulations 2013, and it provides benefits based on career average revalued earnings.

The administering authority for the fund is Nottinghamshire County Council. The Pension Fund Committee oversees the management of the Fund whilst the day to day Fund administration is undertaken by a team within the administering authority. Where appropriate some functions are delegated to the Fund's professional advisors. The administering authority is responsible for the preparation and maintenance of the Funding Strategy Statement and the Investment Strategy Statement. These should be amended when appropriate based on the Fund's performance and funding.

By participating in the Local Government Scheme, the Authority is exposed to a number of risks:

- a) Investment risk: The Fund holds investments in assets such as equities which have volatile market values and, while these asset are expected to provide real returns over the longterm, the short-term volatility can cause additional funding to be required if a deficit emerges.
- b) Interest rate risk: The Fund's liabilities are assessed using market yields on high quality corporate bonds to discount the liabilities. As the Fund holds assets such as equities, the value of assets and liabilities may not move in the same way.
- c) Inflation risk: All of the benefits under the Fund are linked to inflation and so deficits may emerge to the extent that the assets are not linked to inflation.
- d) Longevity risk: In the event that the members live longer than assumed, a deficit will emerge in the fund. There are also other demographic risks.
- e) "Orphan" liability risk: As many unrelated employers participate in the Nottinghamshire County Council Pension Fund, there is an orphan liability risk that employers may leave the Fund but with insufficient assets to cover their pension obligations so that the difference may fall on the remaining employers

These risks are mitigated to a certain extent by the requirement to charge the General Fund with the amounts payable to the pension fund or pensioners at the year end, in accordance with statute.

## 2) The Firefighters' Pension Scheme 1992 (1992 FPS)

The Firefighters' Pension Scheme 1992 is an unfunded pension scheme. This scheme has been closed to new entrants since 6 April 2006. Its members are wholetime firefighters. It is a defined benefit, final salary scheme and its arrangements are governed by statute (the Firemen's Pension Scheme Order 1992). All active members were transferred to the Firefighters' Pension Scheme 2015 on 1 April 2022.

## 3) The Firefighters' Pension Scheme 2006 (2006 NFPS)

The Firefighters' Pension Scheme 2006 is also an unfunded pension scheme. This scheme came into effect from April 2006 and its members are retained firefighters and wholetime firefighters. Like the 1992 FPS it is a defined benefit, final salary scheme and its arrangements are governed by statute (the Firefighters' Pension Scheme (England) Order 2006). The Firefighters' Pension Scheme (England) (Amendment) Order 2014 introduced a new modified version of the 2006 Scheme which is available to individuals who were employed as retained firefighters during the period 1 July 2000 to 5 April 2006. Although this modified version does not constitute a scheme on its own, it has different benefits to the main 2006 Scheme. The 2006 Scheme has been closed to new entrants since 1 April 2015. All active members were transferred to the Firefighters' Pension Scheme 2015 on 1 April 2022.

## 4) The Firefighters' Pension Scheme 2015 (2015 FPS)

The Firefighters' Pension Scheme 2015 came into effect on 1 April 2015. Like the 1992 FPS and the 2006 NFPS, it is an unfunded defined benefit scheme and its arrangements are governed by statute (the Firefighters' Pension Scheme (England) Regulations 2014). However, unlike the other two firefighters' schemes, it is a career average rather than a final salary scheme.

The three Firefighters' Schemes are very similar in nature. They are unfunded pension schemes, meaning that there are no investment assets to meet the cost of pension liabilities and cash has to be generated to meet pension payments as they fall due. The Authority has primary responsibility for meeting the costs and managing the risks relating to the firefighters' pension arrangements. However, there is currently an arrangement in place whereby the cost of the schemes are met from contributions paid by employees and the Authority, with any deficit in the funding required being met by a top-up grant from the Home Office. Any surplus funding is paid over to the Home Office.

The 1992 FPS and 2006 NFPS provide benefits based on final salary and length of service at retirement, and the 2015 FPS provides benefits based on revalued average salary. The governance arrangements are managed by the Authority, and this essentially involves managing the cash flows and being responsible for the administration of the schemes. The day to day administration is carried out by West Yorkshire Pension Fund on behalf of the Authority.

Given that the pension schemes are unfunded, the contributions payable are simply those which are sufficient to meet the benefit outgo as and when it arises. As mentioned above, this benefit outgo is largely underwritten by the Home Office. By participating in these pension schemes, the Authority is exposed to some risks:

- a) There are no investment risks in relation to these schemes as they are unfunded. The greatest single risk is that the government could change the arrangements for meeting part of the benefit outgo, which could increase the Authority's contributions.
- b) There is a risk that changes in the assumptions (e.g. life expectancy, price inflation, discount rate) could increase the defined benefit obligation. Other assumptions used to value the defined benefit obligation are also uncertain, although their effect is less material.

A Pension Top-up Grant is received annually from the government to meet the cost of the net funding deficit for the three firefighters' schemes. It is paid directly to the Firefighters' Pension Fund (see the Pension Fund statements on pages 105 to 106) and it is therefore not the Authority's income. However, in IAS 19 terms it is a current contribution towards the Authority's liabilities for retirement benefits. The grant is therefore credited to other operating income in the Comprehensive Income and Expenditure Statement. The grant is not treated as an asset of the firefighters' pension schemes, but as a source of income to the schemes it does reduce the year end pension liability.

The Authority also participates in the Firefighters' Compensation Scheme. The Firefighters' Compensation Scheme (England) Order 2006 makes provision for the payment of pensions, allowances and gratuities to and in respect of persons who die or are permanently disabled as a result of an injury sustained or disease contracted while employed by a fire and rescue authority. The level of benefits payable is dependent on salary, service and the degree of disablement of the individual at the time the injury is incurred. Therefore the level of long term benefits can be both material and volatile. For this reason the Compensation Scheme is treated as an unfunded defined benefit scheme and accounted for, under International Accounting Standard 19 (IAS 19), in the same manner as for the Firefighters' Pension Schemes.

The Compensation Scheme is administered by the Authority in accordance with statutory arrangements. The cost of the scheme is met solely by the Authority. The risks arising from the Authority's participation in this scheme are as follows:

- a) There is a risk that changes in the assumptions (e.g. life expectancy, price inflation, discount rate) could increase the defined benefit obligation. Other assumptions used to value the defined benefit obligation are also uncertain, although their effect is less material.
- b) There is a risk that the government could change the arrangements of the scheme in such a way that the costs incurred by the Authority are significantly increased.

c) Historically the number of firefighters who are permanently disabled or who die as a result of injuries sustained or diseases contracted whilst in the employment of the Authority is very low, so the number of injury pension recipients is relatively small. However, the Authority is committed to pay benefits as and when they fall due, so if the number of occurrences were to increase it could have a significant impact on the amounts payable.

# Court of Appeal ruling for Firefighters/Judges Pension Schemes (the Sargeant and McCloud cases)

The decisions of the Court of Appeal in the Sargeant/McCloud cases (generally referred to as the "McCloud Judgment") ruled that the transitional protections afforded to older members when public service pension schemes were amended constituted unlawful age discrimination. The remedy for the McCloud decision will be delivered in two phases, prospective and retrospective, through the Public Service & Judicial Offices Act and secondary legislation.

The first phase is the prospective remedy which entails closing the legacy final salary schemes and transferring members to the reformed career average scheme (the 2015 FPS) from 1 April 2022. This phase was delivered by the Police and Firefighters' Pension Schemes (Amendment) Regulations 2022.

The second phase is the retrospective remedy, which will move all members' service back into the legacy final salary scheme for the remedy period (1 April 2015 - 31 March 2022) and allow a choice of benefits for this period. It is intended that the legislation to implement this phase will take effect by 1 October 2023 at the latest.

When assessing the potential implications of McCloud in the March 2019 IAS 19 exercise the actuaries calculated the additional liability that would have arisen had members who were not afforded protection continued to accrue benefits in the older final salary schemes. The approximate costs were included in the overall pension liability figure as at 31 March 2019 as a past service cost. In preparing the 31 March 2022 accounting figures, the actuaries have continued to reflect the potential costs arising from the McCloud Judgement on an approximate basis. Once the details of the remedy are finalised the actuaries will reassess the accounting position in full across the schemes to reflect the actual impact and costs.

# **Transactions Relating to Post-employment Benefits**

Past service costs of £223k relating to the 2006 NFPS are recognised under Corporate and Centralised Services in the Comprehensive Income and Expenditure Statement. This past service costs relates to the purchasing of back service credits by members of the modified version of the Scheme.

The Authority recognises the cost of retirement benefits in the reported cost of services when they are earned by employees, rather than when the benefits are actually paid as pensions. However, the charge against council tax is based on the cash payable in the year, so the real cost of post-employment/retirement benefits is reversed out of the General Fund to the Pension Reserve via the Movement in Reserves Statement.

Following the most recent triennial funding valuation of the LGPS the Authority opted to prepay its secondary contributions for the three years to March 2023 by making a single lump sum payment of £548k in April 2020, thus achieving a saving of £40k. Whilst the full payment of £548k has been recognised in the opening net pension liability, only the amount relating the 2021/22 has been charged to the general fund. The remaining balance is held on the Authority's balance sheet as a prepayment.

The following transactions have been made in the Comprehensive Income and Expenditure Statement and the General Fund Balance via the Movement in Reserves Statement during the year:

Firefighters' schemes £000	LGPS £000	_	Firefighters' schemes £000	LGPS £000

Further information about the Fund's assets can be obtained from the Pension Fund Annual Report, which can be accessed online at www.nottspf.org.uk.

#### **Basis for Estimating Assets and Liabilities**

Liabilities have been assessed on an actuarial basis using the projected unit credit method, an estimate of the pensions that will be payable in future years dependent on assumptions about mortality rates, salary levels etc. The liabilities of the Local Government Pension Scheme and the Firefighters' schemes have been assessed by Barnett Waddingham and Mercer Limited respectively, both of whom are independent firms of actuaries.

The most recent full actuarial valuations for the Local Government Pension Scheme and the Firefighters' schemes were carried out at 31 March 2019 and 31 March 2022 respectively. Actuaries at Barnett Waddingham have adopted a roll-forward approach to updating the net liabilities for the Local Government Pension Scheme as at 31 March 2022. This approach takes into account the cashflows paid into and out of each scheme before taking into consideration any changes in assumptions. The liabilities for the Firefighter Schemes are based on full membership calculations.

The rate of interest used to discount the post-employment benefit obligations is based on the market yields at the reporting date on high quality corporate bonds of equivalent currency and term to the scheme liabilities. In assessing the liabilities for retirement benefits at 31 March 2022 Barnett Waddingham has used a discount rate of 2.60% for the Local Government Pension Scheme (compared with 2.00% at 31 March 2021), and Mercer Ltd has used a rate of 2.8% for the Firefighters' Schemes (compared with 2.1% at 31 March 2021).

The principal assumptions used by the actuaries in their calculations were:

	Local Government Pension Scheme		Firefighters' Schemes 1992, 2006 and 2015		Firefighters' Compensation Scheme	
	2020/21	2021/22	2020/21	2021/22	2020/21	2021/22
Mortality assumptions:						
Longevity at 65 for current pensioners (LGPS) and at 60 for current pensioners (FF Schemes):						
Men	21.6	21.6	26.3	26.1	23.7	23.6
Women	24.3	24.3	28.4	28.4	25.8	25.7
Longevity at 65 for future pensioners (LGPS) and at 60 for future pensioners (FF Schemes):						
Men	22.9	23.0	28.6	28.4	25.9	25.7
Women	25.7	25.8	30.7	30.6	28	27.9
Rate of inflation (CPI)	2.85%	3.20%	2.70%	3.30%	2.70%	3.30%
Rate of increase in salaries	3.85%	4.20%	4.20%	4.80%	4.20%	4.80%
Rate of increase in pensions	2.85%	3.20%	2.80%	3.40%	2.80%	3.40%
Rate of revaluation of CARE pensions (2015 Scheme only)			3.95%	4.55%		
Rate for discounting scheme*	2.00%	2.60%	2.10%	2.80%	2.10%	2.80%

<sup>\*</sup>The discount rate is determined by reference to market yields at the end of the reporting period on high quality corporate bonds.

The estimation of the defined benefit obligations is sensitive to the actuarial assumptions set out in the table above. The sensitivity analyses below have been determined based on reasonable possible changes of the assumptions occurring at the end of the reporting period and assumes for each change that the assumption analysed changes while all other assumptions remain constant. This approach is not necessarily realistic, since some assumptions are related: for example, if inflation were to increase it might be reasonable to expect that nominal yields on corporate bonds will increase also. However, it enables the reader to isolate one effect from another.

## Asset and Liability Matching Strategy

The Local Government Pension Scheme does not use any asset and liability matching strategies to manage risk. The Pension Fund Annual Report details the nature and extent of risks arising from financial instruments, and the Fund's Risk Management Strategy and Risk Register details the measures taken to mitigate those risks. These documents are available at www.nottspf.org.uk.

#### Impact on the Authority's Cash Flows

The defined benefit liability shows the underlying commitments that the Authority has in the long run to pay retirement benefits. The total liability of £635m has a substantial impact on the net worth of the Authority as recorded in the Balance Sheet, however statutory arrangements for funding the deficit mean that the financial position of the Authority remains healthy:

• The net liability on the Local Government Pension Scheme will be made good by increased contributions over the remaining working life of employees (i.e. before payments fall due), as assessed by the scheme actuary. The aims of the Fund are to keep employer contribution rates as constant as possible. Contributions are set every three years as a result of the actuarial valuation of the Fund required by the Regulations. The next actuarial valuation of the Fund will be carried out as at 31 March 2022 and will set contributions for the period from 1 April 2023 to 31 March 2026. There are no minimum funding requirements in the LGPS but the long term funding objective is for the Fund to achieve and then maintain sufficient assets to cover 100% of projected accrued liabilities.

- Finance is only required to be raised to cover firefighter pensions when the pensions are actually paid, and any shortfalls are currently met by the Home Office.
- Finance is only required to be raised to cover the costs of the firefighters' compensation scheme when the pensions are actually paid, and these costs are included in the Authority's annual budget. The amount spent in 2021/22 was £720k.

The total contributions expected to be made by the Authority to the Local Government Pension Scheme in the year to 31 March 2023 is £1001k. The total expected contributions for the Firefighters' Pension Schemes and Compensation Scheme are £14.8m inclusive of government top-up grant.

The weighted average duration of the defined benefit obligation for Local Government Pension Scheme Members is 23 years. The weighted average durations of the defined benefit obligations of the 1992 FPS, 2006 NFPS, 2015 FPS and the Firefighters' Compensation Scheme are 17 years, 28 years, 36 years and 22 years respectively.

#### **40 CONTINGENT ASSETS AND LIABILITIES**

At 31 March 2022, the Authority had no contingent assets

At 31 March 2022, the Authority has a contingent liability relating to the 2015 Firefighters' Pension Scheme. An employment tribunal case was brought against the Government in relation to possible discrimination in relation to the introduction of the 2015 Firefighters' Pension Scheme. The scheme included transitional protection arrangements between the old scheme and the new scheme. These transitional arrangements were found to be unlawful as they discriminated on the grounds of age. Fire Authorities are in a difficult position as they are required to implement the remedy in a timely manner whilst the discriminatory part of the pension legislation is not expected to be updated until at least October 2023. After the withdrawal of its Immediate Detriment guidance, the government are not recommending that Immediate Detriment cases are addressed until new legislation is in place due to the difficulties particularly around tax arrangements. However, due to the risk of future litigation, the Authority approved continuation of applying immediate detriment remedy at its Policy and Strategy meeting on 1 April 2022. It is not yet clear what future costs the Authority will face in implementing the McCloud remedy and whether there will be any new burden grant available from the government to cover these costs, which could be significant. The Authority approved the creation of a £200k earmarked reserve to cover potential McCloud costs in April 2022.

#### 41 NATURE AND EXTENT OF RISKS ARISING FROM FINANCIAL INSTRUMENTS

The Authority's activities expose it to a variety of financial risks:

- Credit risk the possibility that other parties might fail to pay amounts due to the Authority
- Liquidity risk the possibility that the Authority might not have funds available to meet its commitments to make payments
- Re-financing risk the possibility that the Authority may be required to renew a financial instrument on maturity at less advantageous interest rates or terms
- Market risk the possibility that financial loss might arise as a result of changes in, for example, interest rates.

# Overall procedures for managing risk

The Authority's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the resources available to fund services. Risk management is carried out by the Finance Team, in conjunction with treasury advisors from Link Asset Services. Risk Management policies are approved by the Authority.

The procedures for managing risk are set out through a legal framework based on the Local Government Act 2003 and associated regulations. These require the Authority to comply with the CIPFA Prudential Code, the CIPFA Code of Practice on Treasury Management in the Public Services and investment guidance. Overall, these procedures require the Authority to manage risk in the following ways:

- by formally adopting the requirements of the CIPFA Treasury Management Code of Practice;
- by the adoption of a Treasury Policy Statement and treasury management clauses within its financial regulations/standing orders;
- by approving annually in advance prudential and treasury indicators for the following three years limiting:
  - The Authority's overall borrowing;
  - Its maximum and minimum exposures to the maturity structures of its debt;
  - Its management of interest rate exposure;
  - Its maximum annual exposures to investments maturing beyond a year.
- by approving an investment strategy for the forthcoming year, setting out its criteria for both investing and selecting investment counterparties in compliance with Government guidance.

The annual treasury management strategy and prudential code indicators for 2021/22 were approved by the Authority on 26 February 2021. The key issues within the treasury management strategy were:

- The Authorised Limit for 2021/22 was originally set at £38.3m. This is the maximum limit of external borrowings or other long term liabilities.
- The Operational Boundary was set at £34.0m. This is the expected maximum level of debt and other long term liabilities during the year.
- The maximum proportions of fixed and variable interest rate exposure were set at 100% and 30% respectively.
- Maximum and minimum exposures to the maturity structure of debt were set, which
  restricted the amount of short term debt as a way of reducing exposure to re-financing risk.
- An upper limit of £2.0m was set for principal sums invested for longer than 365 days.

The Authority has adopted the CIPFA Treasury Management in the Public Services Code of Practice and Cross-Sectoral Guidance Notes (updated) and sets prudential and treasury indicators each year to control the key risks arising from financial instruments.

#### **Credit Risk**

Credit risk arises from deposits with banks and financial institutions, as well as credit exposures to the Authority's customers. The risk is minimised through the Annual Investment Strategy, which is contained within the Annual Treasury Management Strategy.

The Annual Investment Strategy required that deposits are not made with financial institutions unless they meet identified minimum credit criteria, in accordance with the Fitch, Moody's, and Standard & Poor's Credit Rating Services. The Authority has a list of approved banks and financial institutions to which it will lend surplus cash. The list is based on minimum independent credit ratings from the Credit Rating Services, which are overlaid by credit outlooks, credit default swap spreads and sovereign ratings to give an overall rating for each counterparty which indicates a maximum term for investments. The annual investment strategy also considers maximum amounts to be deposited with any one institution. The Authority is advised of ratings changes by Link Asset Services and the list is updated accordingly on an ongoing basis.

The Authority's maximum exposure to credit risk in relation to its investments with banks and other local authorities cannot be assessed generally as the risk of any institution failing to make interest payments or to repay the principal sum will be specific to each individual institution. Recent experience has shown that it is rare for such entities to be unable to meet their commitments, and there was no evidence at 31 March 2022 that any of the Authority's deposits might not be repaid.

Invoices to customers for chargeable services are usually of relatively low value. The Authority actively pursues outstanding debts, and the Debt Recovery Policy provides for non emergency services to be ceased to non paying customers.

## Amounts arising from Expected Credit Losses

Impairment losses are calculated to reflect the expectation that the future cash flows might not take place because the borrower could default on their obligations. Credit risk plays a crucial part in assessing losses, particularly where risk has increased significantly since the investment or debtor was initially recognised. Impairment is based on the principle of credit loss, which is defined as cash shortfalls measured by the difference between the cash flows that are contractually due to the Authority, and the cash flows that the Authority expects to receive.

Changes to credit risk relating to investments are assessed based on information obtained from Credit Rating Services, the financial press, and the Authority's treasury advisors. Credit risk relating to investments will also be deemed to have increased significantly should contractual payments of principal or interest become more than 30 days overdue.

Since the Annual Investment Strategy prohibits the use of investment counterparties that do not meet minimum creditworthiness criteria, all investments are considered to have low credit risk upon initial recognition.

Credit risk relating to trade receivables is not deemed to have increased significantly until payments become more than 120 days overdue. The Authority is very successful at collecting trade debtors, which is reflected by the fact that no debts have been written off during the past seven years. Experience therefore shows that debts are highly likely to be recovered.

In accordance with the Authority's accounting policies, lifetime expected credit losses have been calculated for trade receivables and 12-month expected credit losses have been calculated for investments.

The lifetime expected credit losses were assessed using a provision matrix which calculates a fixed provision rate based on the number of days that a receivable is past due, assessed on the basis of historical experience from the previous five years and adjusted (if necessary) to reflect current conditions and forecasts of future conditions. A loss allowance is not recognised for expected credit losses on a financial instrument where the counterparty is central government or a local authority for which relevant statutory provisions prevent default.

The calculation for the 12-month expected credit losses was based on the historic default rate for A-rated investments which was produced by combining multi-year historic default rate data up to the end of December 2020 from the three main credit rating agencies. The credit losses were found to be immaterial and have therefore not been recognised. During the year the Authority has not written off any financial assets.

The Authority has the following exposure to credit risk at 31 March 2022:

	Credit risk rating / Provision matrix category	Historical experience of default	Gross Carrying amount £000
12-month expected	AAA	0.04%	0
	AA	0.02%	0
	Α	0.05%	9,748
Simplified approach (lifetime credit losses for trade receivables)	Not due 1-30 days 31-60 days	0.00% 0.00% 0.00%	1 0 0
	61-90 days	0.00%	0
	91-120 days	0.00%	0
	121+ days	0.00%	0

## **Liquidity Risk**

# Liquidity Risk

The Authority manages its liquidity position through the risk management procedures outlined above (the setting and approval of prudential indicators and the approval of the treasury management strategy), as well as through cash flow management processes. This ensures that sufficient cash balances are maintained to meet daily revenue requirements without recourse to borrowing other than short term borrowing to deal with temporary cash flow deficits.

The Authority has ready access to borrowings from the money markets to cover any day to day cash flow needs and is able to access borrowings from the Public Works Loan Board for longer term funds so there is no significant risk that it will be unable to raise funds in order to meet its commitments relating to financial liabilities.

## Re-financing and Maturity Risk

The risk to which the Authority is exposed is that it will need to replenish its borrowings when interest rates are unfavourable. The Authority's strategy is to place limits on the percentage of borrowings due to mature within 10 years, as follows: maturing within 12 months – less than 20%; maturing 12 months to 5 years – less than 30%; maturing 5 years to 10 years – less than 75%. Between 0% and 100% of borrowings may fall due for repayment after 10 years, and between 30% and 100% of borrowings may fall due for repayment after 20 years. This strategy allows the Authority time to restructure debt when interest rates are favourable.

The Authority maintains a significant debt and investment portfolio. Whilst the cash flow procedures above ensure adequate liquidity, longer-term risk to the Authority relates to managing the exposure to replacing financial instruments as they mature. This risk relates to both the maturing of longer term financial liabilities and longer term financial assets.

The approved treasury indicator limits for the maturity structure of debt and the limits on investments placed for greater than one year in duration are the key parameters used to address this risk. The Finance team manages the risk within the approved parameters by:

- monitoring the maturity profile of financial liabilities and amending the profile through either new borrowing or the rescheduling of the existing debt; and
- monitoring the maturity profile of investments to ensure sufficient liquidity is available for the Authority's day to day cash flow needs, and the spread of longer-term investments provide stability of maturities and returns in relation to the longer term cash flow needs.

The maturity analysis of financial liabilities is as follows, with the maximum and minimum limits for fixed interest rates maturing in each period:

	Approved minimum limits	Approved maximum limits	Actual 31 March 2021 £000	Actual 31 March 2022 £000
Less				
than 1	0%	20%	62	52
year Between				
1 and 5	0%	30%	3,006	4,000
years Between				
5 and 10	0%	75%	3,500	2,500
years Between				
10 and 20 years	0%	100%	2,000	4,000
Over 20 years	30%	100%	18,400	22,400
Total			26,968	32,952

#### **Market Risk**

#### Price risk

The Authority has no investments in equity shares and therefore has no exposure to loss arising from movements in share prices.

#### Foreign exchange risk

The Authority has no financial assets or liabilities denominated in foreign currencies and therefore has no exposure to loss arising from exchange rate movements.

## Interest rate risk

The Authority is exposed to interest rate movements on its borrowings and investments. Movements in interest rates have a complex impact on the Authority. For instance, a rise in variable and fixed interest rates would have the following effects:

- Borrowings at variable rates the interest expense charged to the Surplus or Deficit on the Provision of Services will rise
- Borrowings at fixed rates the fair value of the borrowing will fall (no impact on revenue balances)
- Investments at variable rates the interest income credited to the Surplus or Deficit on the Provision of Services will rise
- Investments at fixed rates the fair value of the assets will fall (no impact on revenue balances).

Borrowings are not carried at fair value on the balance sheet, so nominal gains and losses on fixed rate borrowings would not impact on the Surplus or Deficit on the Provision of Services or Other Comprehensive Income and Expenditure. However, changes in interest payable and receivable on variable rate borrowings and investments will be posted to the Surplus or Deficit on the Provision of Services and affect the General Fund Balance. Movements in the fair value of fixed rate investments that have a quoted market price will be reflected in the Other Comprehensive Income and Expenditure Statement.

The strategy is to set a maximum proportion of interest on borrowing which is subject to variable rates. This maximum is determined annually, kept under review and reported to the Fire Authority through the Treasury Management Strategy. In 2021/22 this maximum was set at 30%. In addition, the annual Treasury Management Strategy includes an expectation of interest rate movements, which can be taken into account when planning borrowing and investment activities and when determining whether fixed or variable rate instruments are appropriate. The portfolio of long term borrowings is kept under review and may be restructured when interest rate changes make it advantageous to do so.

If all interest rates had been 1% higher (with all other variables held constant) the financial effect would be:

Decrease in fair value of fixed rate borrowings 5,933

The impact of a 1% fall in interest rates would be an equivalent increase in fair value.

8,575	Central Government	9,358
(6,838)	Top-up grant received from Central Government	(6,174)
	Balance of top-up grant for the year (receivable	
(1,737)	from)/payable to Central Government	(3,184)

#### PENSION NET ASSETS STATEMENT

The net current assets and liabilities arising from the operation of the pension fund are shown in this statement. This statement does not take account of liabilities to pay pensions and other benefits after the period end. Such liabilities are shown in the core accounting statements and are explained in more detail in note 39.

2020/21 £000		2021/22 £000
	Current Assets	
3	Contributions due from members	0
0	Transfer into Scheme Receivable	37
1,046	Prepaid Pensions	1,059
1,710	Pension top-up grant receivable from Central Government	3,195
2,759	Total	4,291
	Current Liabilities	
(14)	Unpaid pension benefits	(635)
(69)	Tax payable on behalf of members	(121)
(2,676)	Amount owing (to)/from General Fund	(3,535)
(2,759)	Total	(4,291)
0	Net Current Assets	0

#### **NOTES TO THE PENSION STATEMENTS**

## 1. The Firefighters' Pension Fund

The Firefighters' Pension Fund was established for Fire Authorities in England under the Firefighters' Pension Scheme (Amendment) (England) Order 2006.

All Firefighters' Pension Schemes are unfunded, and consequently the fund holds no investment assets. Benefits are payable to pensioners in accordance with the regulations. Benefits payable are funded by contributions from employees and from the Authority, and any deficit in the funding required is met by a top-up grant from the Home Office. If the amounts receivable exceed the amounts payable then the surplus is paid over to the Home Office. Employees' and employer's contribution rates are set nationally by central government and are subject to a triennial review by the Government Actuary's Department.

The fund is administered by the Authority in accordance with the regulations. The primary objective of the Pension Fund Statements is to demonstrate the balance of transactions taking place over the year in order to identify the amount of top-up grant payable from, or surplus payable to, the Home Office.

Details of the firefighters' pension schemes can be found in note 39 on pages 84-96.

## 2. Accounting Policies for the Pension Fund

## **General Principles**

The Pension Fund Account and Net Assets Statement summarise the Pension Fund transactions for the 2021/22 financial year and its position at the year end of 31 March 2022. It has been prepared in accordance with the Code of Practice on Local Authority Accounting in the United Kingdom 2021/22.

#### Accruals

Activity is generally accounted for in the year that it takes place, not simply when cash payments are made or received. This is known as the accruals basis. However, employee and employer contributions are not accounted for on an accruals basis as the effect of doing so is not material. Accruals are shown as debtors and creditors in the Net Assets Statement. In all cases, reasonably accurate calculations of accruals have been possible with the information available at the time of preparing the financial statements.

# Administration Costs

The cost of managing pension activities, which includes part of the costs of Human Resources, Payroll and Finance staff as well the cost of pension administration services and actuarial services, are not accounted for within the Pension Fund but are included in the Authority's Comprehensive Income and Expenditure Statement.

## The Liability to Pay Pensions

The Pension Fund financial statements show the income and expenditure for the year. They do not take account of the liability to pay future retirement benefits. This liability has been assessed by an independent firm of actuaries and is shown in the Authority's balance sheet. Further details of this liability can be found in note 39 to the core financial statements.

# NOTTINGHAMSHIRE AND CITY OF NOTTINGHAM FIRE AND RESCUE AUTHORITY STATEMENT OF ACCOUNTS 2021/22

#### 1 SCOPE OF RESPONSIBILITY

- Nottinghamshire Fire and Rescue Authority (the Authority) is responsible for ensuring that its business is conducted in accordance with the law and proper standards, and that public money is safeguarded, properly accounted for, and used economically, efficiently, effectively, and equitably. The Authority also has a duty under the Local Government Act 1999 to make arrangements to secure continuous improvements in the way in which its functions are exercised having regard to a combination of economy, efficiency and effectiveness.
- 1.2 In discharging this overall responsibility, the Authority is responsible for putting in place proper arrangements for the governance of its affairs, facilitating the effective exercise of its functions, use of its resources and including arrangements for the management of risk and the maintenance of an effective internal control environment.
- 1.3 In 2017 the Authority approved and adopted a new local code of corporate governance, which is consistent with the principles of the 2016 CIPFA (Chartered Institute of Public Finance and Accountancy) / Solace framework *Delivering Good Governance in Local Government:* 
  - Behaving with integrity, demonstrating strong commitment to ethical values, and respecting the rule of law.
  - Ensuring openness and comprehensive stakeholder engagement.
  - Defining outcomes in terms of sustainable economic, social, and environmental benefits.
  - Determining the interventions necessary to optimise the achievement of the intended outcomes.
  - Developing the entity's capacity, including the capability of its leadership and the individuals within it.
  - Managing risks and performance through robust internal control and strong public financial management.
  - Implementing good practices in transparency, reporting, and audit to deliver effective accountability.
- 1.4 This statement sets out how the Authority has complied with the Code and also meets the requirements of regulation 6 of the Accounts and Audit (England) Regulations 2015 in relation to the publication of an annual governance statement.

#### 2 THE PURPOSE OF THE GOVERNANCE FRAMEWORK

- 2.1 The governance framework comprises the systems, processes, cultures and values for the direction and control of the Authority and the activities through which it accounts to, engages with, and leads the community. It enables the Authority to monitor the achievement of its strategic objectives and to consider whether those objectives have led to the delivery of appropriate and cost-effective services.
- 2.2 The system of internal control is a significant part of that framework and is designed to manage risk to a reasonable level. It cannot eliminate all risk of failure to achieve policies, aims and objectives and can therefore only provide reasonable and not absolute assurance of effectiveness. The system of internal control is part of an ongoing process designed to identify and prioritise the risks to the achievement of Nottinghamshire Fire and Rescue Authority's policies, aims and objectives, to evaluate the likelihood of those risks being realised and the impact should they be realised, and to manage them efficiently, effectively, and economically.

## 3.0 THE GOVERNANCE FRAMEWORK

- 3.1 In addition to the Annual Governance Statement the Authority has a Code of Corporate Governance that the Authority will commit to in carrying out its duties and responsibilities. In this document, officers have identified against each of the Code's principles what source documentation or existing practice demonstrates how the Authority complies with the principles that make up the Code.
- 3.2 In developing a code of corporate governance, the Authority had the aim of seeking compliance with the CIPFA / Solace guidelines and recognised that these constitute good practice for local authority organisations.
- The Local Code of Corporate Governance was adopted by the Authority in February 2017. This Annual Governance Statement, and the annual review of governance is against this framework.
- 3.4 Summarised below are some of the key elements of the systems and processes that underlie the Authority's governance arrangements:

# Identifying and Communicating the Authority's vision and outcomes for citizens and service users

After consulting with the citizens of Nottinghamshire and service users, assessing current risks and service priorities, the Authority is required to prepare an Integrated Risk Management Plan (IRMP) that sets out the vision and service objectives for the organisation. The IRMP is delivered via the <a href="Strategic Plan 2019 - 2022">Strategic Plan 2019 - 2022</a> which was approved by Fire Authority in February 2019 and revised in February 2020 to reflect the outcome of the HMICFRS (Her Majesty's Inspectorate of Constabulary and Fire and Rescue Services) report and the appointment of a new Chair to the Fire Authority. From April 2022 the Community Risk Management Plan (CRMP) replaces the Strategic Plan.

- The Strategic Plan sets out how the service aims to achieve its vision of creating safer communities. The vision is underpinned by our three strategic aims:
  - To provide high quality services,
  - To ensure that our employees are engaged and motivated,
  - To provide strong governance and financial sustainability.
- The Plan sets out to achieve these aims using annual action plans which detail the key objectives for the year ahead. These cascade down to departmental business plans. Progress is monitored by the Programme and Performance Board and reviewed through Fire Authority governance. Every year a <a href="Statement of Assurance">Statement of Assurance</a> is produced which outlines how the service has performed against the Strategic Plan. The 2021/22 Statement of Assurance was approved by Fire Authority in July 2022.

#### The Internal Control Environment

3.8 The Authority's internal control environment comprises many systems, policies, procedures, and operations. These can be broadly split into risk management, internal check/financial control, and internal audit. Internal check and financial control are targeted towards financial matters whereas risk management has a much broader brief and is more associated with the risk of non-achievement of objectives and targets. The system cannot eliminate all risks of failure to achieve the Authority's aims and objectives. Once a risk has been identified the Authority, where possible, will eliminate that risk. If this is not possible or not cost effective then procedures are established to manage the risk effectively, efficiently, and economically. Some of the significant control processes are outlined below.

#### **Policy and Decision-Making Process**

3.9 The Authority has democratic control over its activities via an approved committee structure with agreed powers and duties that are periodically reviewed. The Authority has a written constitution that sets out how the Authority operates, how decisions are made and the procedures which are followed to ensure these are efficient, transparent, and accountable. There is a formal briefing process prior to reports being finalised for Committee or Fire Authority meetings thus allowing key Members an opportunity to scrutinise proposed reports in detail. The Authority also runs Member seminars and training sessions to help Members discuss issues in more detail and in an informal environment.

# **Management Structure**

- 3.10 The Authority has a clear management structure with defined roles and responsibilities. The Strategic Leadership Team (SLT) includes all department heads as well as the Principal Officers. The current structure empowers managers to make appropriate decisions but also places accountability at the centre of this process.
- 3.11 The Authority has an approved scheme of delegation to officers that is reviewed periodically by the Chief Fire Officer and the Clerk to the Fire Authority, with any changes being approved by the Fire Authority.

## **Established Policies, Procedures & Regulations**

- The Authority ensures compliance with established policies, procedures, laws, and regulations. The information regarding policies and procedures is held on the intranet, and these are continually enhanced and developed through the introduction of new policies and procedures as and when required. The Authority has established policies on anti-fraud and whistleblowing. The Authority carries out a regular review of financial regulations which clearly define how decisions are taken and the processes and controls required to manage risk. The list below outlines some of the key policies and process in place to enhance the internal control system, which are reviewed as and when required:
  - Treasury Management Strategy.
  - Procurement Strategy.
  - Financial Regulations & Standing Orders.
  - Scheme of Delegation.
  - Counter Fraud, Money Laundering, Corruption and Bribery policy.
  - Whistleblowing Policy.
  - Complaints procedure.
  - Code of Corporate Governance.
  - Constitution.
  - Code of Conduct.
  - Equality and Diversity framework.
  - Workforce plan.
  - Full range of robust policies and procedures to underpin the conduct of staff from operational procedures, discipline processes, through to performance development reviews.

#### **Internal Audit Function**

The requirement for an Authority to maintain an Internal Audit function is derived from local government legislation, including Section 112 of the Local Government Finance Act 1988 and the Accounts and Audit Regulations 2015 in that a relevant body must:

"maintain an adequate and effective internal audit of its accounting records and of its system of internal control in accordance with the proper internal audit practices"

- The responsibility for ensuring an effective internal audit function rests with the Authority Treasurer as part of their Section 112 obligations.
- The Authority has a strong Internal Audit function arrangement with Nottinghamshire County Council and has well-established protocols for working with External Audit. Finance and Resources Committee review all internal audit reports and receive an annual internal audit report providing an audit opinion on the Authority's arrangements for governance, risk management and control as well as details of audits to be completed in the forthcoming year.
- 3.16 The Authority reviews Internal Audit as an integral part of the corporate governance framework

### **Risk Management Strategy**

- The Authority has a well-established and embedded risk management strategy. This is managed at the corporate/strategic level by The Finance and Resources Committee which receive regular reports on risk exposures both in terms of existing and emergent risk. Members scrutinise risk registers and receive explanations for changes. The Committee is advised by the Head of Finance and the Service's Risk Manager on behalf of the Chief Fire Officer.
- 3.18 The system of internal control is based on an ongoing process designed to identify and prioritise risks to the achievement of Service policies, aims and objectives, to evaluate the likelihood and impact of those risks being realised and facilitate a risk management culture to enable risks to be effectively assessed, managed, monitored and reported.

# **Business Continuity Management (BCM)**

3.19 Under the Civil Contingencies Act (2004) (Part 1. Para 2(1) (C)) and The Fire and Rescue Services Act 2004 there is a duty for all Category 1 Responders to prepare plans to ensure so far as reasonably practicable, that if in an emergency the Service can perform its core functions.

## **Best Value Duty**

3.20 The Authority ensures the economical, effective, and efficient use of resources, and secures continuous improvement in the way in which its functions are exercised, by having regard to a combination of economy, efficiency, and effectiveness as required by the Best Value duty. The requirement to deliver services within a reducing budget over recent years has increased the focus on Best Value and the Authority has procurement policies in place, providing a framework within which to buy goods and services which offer good value for money.

## **Financial Management**

- 3.21 Financial management in the Authority and the reporting of financial standing is undertaken through a financial system which integrates the general ledger, sales ledger and purchase ledger functions and facilitates good budgetary control. Budget Managers are supported by Finance Officers in the use of this system for monitoring financial performance.
- The timetable for publishing and auditing the Authority's Statement of Accounts is set out in the Accounts and Audit Regulations 2015. These were amended for the 2020/21 and 2021/22 Statement of Accounts to allow additional time to prepare the accounts in the light of Covid-19 and resourcing issues within the audit sector. The publishing date of the unaudited accounts has been extended from 31 May to 31 July and the approval by Fire Authority of the audited accounts from 31 July to 30 September.

## **Financial Management Code**

- In October 2019, CIPFA issued a new Financial Management Code. The purpose of the code is to support good practice in financial management and to assist authorities in demonstrating their financial sustainability. It contains a set of minimum standards for financial management for local authorities, including fire authorities. These cover the areas of:
  - Organisational leadership clear strategic direction.
  - Accountability based on medium term financial planning.
  - Transparency using consistent, meaningful and understandable data.
  - Adherence to professional standards.
  - Assurance.
  - Long term sustainability.
- The Financial Management Code was adopted by the Authority in July 2021.

#### A REVIEW OF EFFECTIVENESS

- The Authority has responsibility for conducting a review of the effectiveness of its governance framework including the system of internal control, at least annually. The review of effectiveness is informed by the work of the Strategic Leadership Team and other senior managers within the Authority who have responsibility for the development and maintenance of the governance environment, the Internal Audit annual report, and also by comments made by the external auditors and other review agencies and inspectorates.
- 4.2 Maintaining and reviewing the effectiveness of the governance framework throughout the financial year has been carried out by the following:
  - The Authority and its Committees
  - Management Review
  - Internal audit
  - HMICFRS (Her Majesty's Inspectorate of Constabulary and Fire & Rescue)
  - External bodies

#### The Authority and its Committees

- 4.3 The format and structure of the Authority's democratic decision process is re-affirmed at the Annual General Meeting of the Fire Authority in June of each year and approval is given to the powers and make-up of the following committees:
  - The Policy and Strategy Committee,
  - The Finance and Resources Committee (which undertakes the role of the Audit Committee).
  - The Community Safety Committee,
  - The Human Resources Committee.
- In addition to the above Committees, there are also panels for appointments, Equalities, Personnel matters, and the Firefighters' Pension Schemes.
- 4.5 Terms of reference and responsibilities for all these Committees form part of the Authority's Governance arrangements.

# **Management Review**

4.6 Included in the day-to-day management of the organisation are a number of key officers, systems and procedures designed to provide core elements of the internal control mechanism, with a nominated lead officer responsible for reviewing the effectiveness of these systems.

## **Performance Management**

- 4.7 There is a system of performance management and review embedded within the Authority's management structure and processes. The 2019/22 Strategic Plan set out the Authority's key objectives and these are reflected in annual departmental business plans. These plans have been monitored by the Programme and Performance Board (which is made up of SLT members) and managed by the individual departmental management teams.
- 4.8 Performance against the Strategic Plan is reviewed in the Annual Statement of Assurance published each year.
- 4.9 A new performance management framework was developed early in the life of the Strategic Plan to improve the management of organisational performance and to increase accountability to the community in respect of the way that services are delivered.

### **Risk Management**

- 4.10 Risk management at the strategic / corporate level forms part of the overall responsibilities of The Finance and Resources Committee and Members of this committee take a keen interest in Risk Management and receive update reports every six months.
- 4.11 Risk Management is an integral part of project management and business planning within the Corporate Support department and both this and operational risk management are considered strong. The Service has a Risk Assurance Team which is responsible for corporate risk, operational risk and health and safety risk. The purpose of this is to enhance the co-ordination of assurance activities and management of risk within the Service.

# **Business Continuity**

- 4.12 Business continuity arrangements are regularly reviewed. The Covid-19 pandemic allowed for real life testing of plans and of the management systems and processes in place and they ensured that the service continued to deliver critical activities to the communities of Nottinghamshire, in addition to ensuring staff welfare was maintained. The service was also able to support local agencies and partners by taking on additional activities during the pandemic.
- 4.13 Towards the end of 2020 business continuity plans were reviewed and developed again to learn from the Covid-19 experience, covering both strategic requirements and departmental level actions that should be taken in the event of business disruption. These were tested using tabletop exercises to ensure that the Service could still fulfil its statutory duties in terms of responding to multiple major incidents during a pandemic situation.

#### **Professional Staff**

- The Authority employs appropriate professional staff:
  - A Statutory Monitoring Officer is responsible for ensuring the legality of Authority
    actions and supporting the Committee decision making process. No actions of the
    Authority were deemed ultra vires in the year. All relevant laws and regulations
    are being complied with. The monitoring officer is a qualified solicitor provided on
    a contractual basis to the Authority by the Legal Services Department of
    Nottingham City Council. This arrangement also
  - The Treasurer to the Authority ensures the proper and effective administration of the financial affairs of the Authority and holds the key statutory responsibilities under Section 112 of the Local Government and Finance Act 1988. The role of Treasurer is provided by the current Head of Finance and Treasurer post within the Service. This post holder is responsible for advising both senior managers and elected members on all financial matters in line with CIPFA's document The Role of the Chief Financial Officer. The post holder is professionally qualified and has many years' experience within Local Authority Finance.

### **Financial Planning**

- The Medium-Term Financial Strategy sets out a 4-year financial plan which is approved by Fire Authority in November or December each year. This, alongside the Strategic Plan, provides the framework for developing the annual budget for the coming year. Any projects put forward for additional funding as part of the budget process are evaluated against the key objectives set out in the Strategic Plan.
- The draft budget is scrutinised by the Finance and Resources Committee in January each year prior to final approval in February by Fire Authority. This process ensures that a realistic and affordable budget is achieved.
- The Authority continued to ensure it had good arrangements for managing its finances including strong leadership throughout the year. The financial planning process is well embedded and understood across the Authority by staff and Members. It ensures that funding is matched to the strategic goals identified in the Strategic Plan. An in-house financial team, managed by the Head of Finance and Treasurer, maintains the correct competencies and ensures that the Strategic Leadership Team receives all appropriate information to support the key decisions and objectives of the service.

# **Budget Monitoring / Efficiency**

- Budget monitoring remains robust at both strategic and service level via the production of regular financial monitoring reports for both Capital and Revenue budgets alongside monitoring of treasury activity against the Prudential Indicators for the year. These reports, as well as being scrutinised by budget managers, are reported to the Strategic Leadership Team and quarterly to the Finance and Resources Committee.
- Functional Heads also exercise a detailed degree of budget monitoring against both revenue and capital budgets.

- 4.20 A Transformation and Efficiency Strategy for 2020/21 and 2021/22 was approved by Fire Authority in February 2020 with the objective of further transforming the service and increasing efficiency and effectiveness.
- 4.21 The 2022/23 budget report considered by Fire Authority in February 2022 identified a potential £2m gap in funding from 2023/24 onwards. The Policy and Strategy Committee approved an approach to developing further efficiencies in May 2022 as part of its Futures 2025 Efficiency Strategy.

### **Financial Management Code**

- 4.22 The Financial Management Code was adopted by the Authority in July 2021. A gap analysis was undertaken where a small number of improvements were identified. All but one of these have now been implemented. This related to making more governance related information available on the website. This is pending a review of governance which is due to be completed in summer 2022.
- 4.23 Internal Audit have undertaken an audit of the Service's compliance against the Code. This provided a Reasonable Assurance level ie that risk levels were acceptable. The report acknowledged that effective controls were in place regarding self-assessment, leadership, accountability, long term sustainability and value for money.
- 4.24 The report identified 4 areas where improvements are required:
  - Leadership Several policies and procedures in relation to governance arrangements have not been updated in accordance with the revision schedule and have been found to be out of date;
  - Accountability The processes to identify when a budget holder has overcommitted capital expenditure are not robustly applied and have allowed a budget to become significantly overspent;
  - Professional Standards Financial Regulations, Financial Procedures and Statement of Financial Principles are out of date;
  - Sources of Assurance several internal audits have been delayed or could not be completed as a result of incomplete information being provided.
- 4.25 An action plan for improvement in these areas has been agreed and will be monitored by the Strategic Leadership Team.

#### **Internal Audit**

- 4.26 The Authority views Internal Audit as an integral part of the corporate governance framework, particularly in so far as it relates to the system of Internal Control. Whilst it is acknowledged that Internal Control is a managerial responsibility, it is considered that Internal Audit can provide managers with independent assurance that the system is working effectively and draw any deficiencies in the system to the attention of managers and elected members.
- 4.27 These assurances, however, can only be relied upon providing the internal audit service is adequate to meet the needs of the organisation and is provided professionally.

- The Internal Audit Service of the Authority is provided under a Service Level Agreement with Nottinghamshire County Council and requires the Auditors to operate within the Public Sector Internal Audit Standards set down by the Chartered Institute of Public Finance and Accountancy (CIPFA). Operating to these standards will ensure that the Authority meets its obligations under statute.
- 4.29 CIPFA published a guide on the role of the Head of Internal Audit in 2019 which led to the adoption of an Audit Charter in June 22, improved planning of audits and closer engagement with SLT and the Chair of Finance and Resources Committee, which fulfils the role of the Audit Committee.
- 4.30 The annual audit plan is reviewed each year by SLT and Finance and Resources Committee but remains flexible to enable the Treasurer to adapt to any changing needs within the year.
- All internal audit reports include an assessment of the internal controls and prioritised action plans, if relevant, to address any areas needing improvement. These reports were submitted to the Chief Fire Officer, the Head of Finance, Chair of the Finance and Resources Committee and the relevant managers as appropriate. All finalised reports are reviewed by SLT and submitted to the Finance and Resources Committee acting in its role as Audit Committee.
- 4.32 The Internal Audit Annual Report for 2021/22 was reported to Finance and Resources Committee on 24 June 2022. Within the report the auditors provided a view on the internal control environment and concluded that:

"Based on the coverage and detailed outcomes, overall, we consider the collective evidence provides reasonable assurance concerning the arrangements in place for corporate governance, risk management and the control environment."

4.33 Seven 2021/22 audits have been finalised during the year. A summary of the 7 audits is

Report	Assurance Level	Comments
Payroll and ITrent	Substantial	
Financial Management Code	Reasonable	
Asset Disposals	Limited	To be re-audited 22/23
Performance Management	None – due to insufficient evidence.	To be re-audited 22/23
Ethical Policies and	Substantial	
Procedures		
Pensions Administration	Substantial	
Facilities Management	Substantial	

- 4.34 The annual report also provided substantial assurance regarding the adequacy and effectiveness of the corporate governance and risk management frameworks, concluding that:
  - Governance arrangements at all three lines of assurance are comprehensive and adaptable.
  - Standards, policies, strategies, plans, and budgets are prepared or reviewed.
  - Performance and financial information and data are monitored and reported on regularly.
  - There is clear accountability for risk, and ownership of individual risks.
  - Significant risks linked to strategic goals are identified, assessed, and reviewed. Risk mitigations are identified.
  - There are protections against fraud and cyber risks.
- 4.35 In addition to the audits undertaken by Internal Audit, the service has had external validation of our procedures regarding Water Rescue and Working at Height, both of which provided substantial assurance. Working practices in both of these areas have been amended to reflect the recommendations in the reports.

#### **External Review**

- 4.36 The External Auditors (currently Ernst Young LLP) are required by the International Standard on Auditing 260 (ISA 260) to communicate about the audit of the Authority's financial statements with those charged with governance. This communication is in the form of a written report which will be presented to Fire Authority on completion of the Audit.
- 4.37 The principal purposes of the Auditors' report are:
  - To present key issues identified during the audit of the financial statements for the year ended 31 March 2022 and any material misstatements in the accounts,
  - To report on any key issues for governance,
  - To report on the Auditors' Value for Money conclusion,
  - To give an "audit opinion" on the financial statements,
  - To report on the implementation of any recommendations in the previous year's ISA 260 report,
  - To seek approval to the management representation letter, which confirms the Authority's responsibilities and actions in relation to the financial statements.
- 4.38 The 2021/22 audit has been delayed due to resourcing issues at EY and the audited statement of accounts are therefore yet to be finalised. A provisional ISA 260 report was presented to Fire Authority in May 2022 which indicated that EY are expecting to issue an unqualified 2020/21 Statement of Accounts. The authority to sign off the final audited Accounts has been delegated to the Head of Finance and Treasurer, in consultation with the Chair of Fire Authority subject to there being no further changes of a material nature. The ISA 260 is expected to be finalised in July 22. A Value for Money conclusion is yet to be completed.
- 4.39 Further delays are expected with regards to the audit of the 2021/22 Statement of Accounts, again due to the lack of External Audit resources. The ongoing delay in the audit of the Accounts presents a risk to the Authority as any audit findings will not be reviewed and corrected in a timely manner.

- 4.40 EY were appointed for a 5-year term through a procurement exercise managed by the Public Sector Audit Appointments Ltd (PSAA). 2021/22 is the fourth year of the contract. EY have indicated that the charge for undertaking the audit on the 2021/22 Statement of Accounts is likely to significantly increase from that originally set out in the contract. This is due to increasing audit regulation, introduction of a new Code of Audit Practice, increased scrutiny relating to the McCloud pension age discrimination case and a general shortage of public sector qualified staff. The situation is common across the whole public sector and negotiations remain ongoing between the Authority, EY and PSAA.
- Fire Authority have opted in to Public Sector Audit Appointment (PSAA) appointment process to select External Auditors for the five years from 2023/24.

# Her Majesty's Inspectorate of Constabulary and Fire and Rescue Services (HMICFRS) Inspection

- 4.42 In addition to the usual Internal and External Audit reviews, the Authority had its first inspection by HMICFRS early in 2019. The inspection delivered an overall rating of Requires Improvement, identifying 24 areas to be requiring improvement. An improvement plan covering the 24 areas was implemented with all areas now addressed.
- 4.43 A second full inspection took place in October and November 2021. The report for this inspection is expected to be released in July 2022.

# **Impact of Covid-19**

The Service coped well during the Covid-19 outbreak with no significant impact on service delivery. It was able to provide support to East Midlands Ambulance Service, the vaccination programme and to local communities through the delivery of food parcels and medicine to residents in need. Governance arrangements were impacted during 2020/21 with some temporary emergency measures put in place. These were no longer required in 2021/22 with governance arrangements returning to normal.

# 5 SIGNIFICANT ISSUES FOR GOVERNANCE IN 2022/23

# **Fire Authority Governance Arrangements**

5.1 In May 2022 the Home Office released a White Paper on Reforming Fire and Rescue Services. This is the Government response to the recommendations from the Grenfell Tower Inquiry, the Kerslake Review (on the Manchester Arena Attack) and to build on the findings from Sir Thomas Windsor's State of Fire and Rescue reports. The White Paper covers three key areas: people; professionalism; and governance. It includes consultation on whether to transfer governance to an executive model such a Combined Authority Mayor or to the Police, Fire and Crime Commissioner model. The consultation ends on 26 July 2022.

#### **Devolution Programme**

- 5.2 In February 22 an invitation from the Government was received to begin negotiating a devolution deal for Nottingham, Nottinghamshire and Derby and Derbyshire. Negotiations have commenced to develop a bid for a Mayoral Combined Authority (MCA). This would compare with areas such as Greater Manchester and the West Midlands.
- 5.3 These negotiations are still in their infancy, but if approved, it could be implemented as soon as May 2024.

## Strategic Plan

The National Framework contains the continued requirement for the authority to have an Integrated Risk Management Plan (IRMP), which is delivered through the Authority's Strategic Plan. The 2019-22 Strategic Plan ended in March 2022. The service has undertaken a fire cover risk review to assess risk across Nottinghamshire. This has been used to develop the next strategic plan (known as the Community Risk Management Plan) of the Authority, which was approved by Fire Authority in February 2022.

### 2022/23 Budget

- The Authority approved a budget for 2022/23 in February 2022 which required a small £153k use of General Fund Reserves. This was only achievable after making temporary savings in the region of £2m. Monitoring of expenditure against the budget as reported to Finance and Resources Committee in June 22 indicated a potential underspend position of £469k, largely due to a high number of vacant posts.
- At present there are still some significant uncertainties around the 2022/23 budget as the pay award (budgeted at 3%) has not yet been agreed and inflation is continuing to increase, with the Bank of England expecting it to peak at 11% in the Autumn.

### Medium Term Financial Strategy and 2023/24 Budget

- 5.7 Budgets for 2023/24 to 2026/27 are due to be agreed by Fire Authority in February 2023. When the current budget was set in February 2022 there was an expected deficit position for 2023/24 onwards in the region of £2m. With current inflation levels and pressure on pay awards this could increase further if funding is not significantly increased. The Futures 25 Efficiency Strategy was outlined at Policy and Strategy Committee in May 22 and work is underway to identify a range of savings to enable the service to meet the financial challenges expected in the coming years.
- Fire Authority approved the creation of £1.8m Earmarked Reserve in December 2021 to provide resources to implement any necessary changes coming out of the Futures 25 programme. these uncertainties, the service is confident that it will financially secure going forward. Reserves are in a strong position (totalling £9.9m as at 31 March 2022).

#### **Pensions**

The McCloud remedy is ongoing regarding the transition arrangements in the 2015 firefighter's pension scheme which were found to be discriminatory on the grounds of age in December 2018. All members have now been moved to the 2015 pension scheme as from 1 April 22. The transition arrangements effective between 1 April 2015 and 31 March 22 need to be removed and members given the choice between their legacy scheme and the 2015 scheme between this period. However, this requires new pension legislation to be passed, and this is not expected before October 23.

- 5.10 Following the ruling and lack of progress, the Fire Brigades Union (FBU) commenced legal proceedings in the High Court for three test cases against Fire and Rescue Authorities. Two of these cases were against NFRS as they related to former NFRS employees. A settlement agreement on these cases was reached on 8 October 2021.
- 5.11 In the interim, the Home Office issued some guidance to assist implementation of the remedy and a Memorandum of Understanding was agreed between the Local Government Association and the Fire Brigades Union in October 21. However, in November 21 the Home Office withdrew its guidance stating that there could be significant financial risk if Authority's decided to proceed implementing Memorandum of Understanding.
- With the ongoing threat of legal action, Policy and Strategy Committee approved the continuation of implementing the Memorandum of Understanding on 1 April 22, acknowledging the financial risks that it may face. An earmarked reserve of £200k has been set aside to cover any additional costs

#### **External Audit**

Delayed local audit opinions are a huge concern across the public sector. These delays have been caused by the increased amount of regulatory requirement and the lack of audit resources within the public sector. The increasingly delayed audit of the Statement of Accounts (see sections 4.38 to 4.41) presents an increased risk to the Authority over the remaining years of the current contract and beyond. Against this backdrop PSAA have commenced the procurement for audit services from 2023/24 onwards with a view to implementing measures to ensure the short-term sustainability of the market. The Fire Authority has approved the participation in the PSAA's tendering process to appoint auditors for the 5 years from 2023/24.

#### Covid-19

The Service does not anticipate any ongoing impact on governance arrangements during 2022/23 and beyond. Finance and Resources Committee removed Covid-19 from the corporate risk register in April 22. This will be kept under review should circumstances change.

# 6 CONCLUSION

- Nottinghamshire Fire and Rescue Authority has well developed and evolving governance arrangements in place that are fit for purpose.
- The Local Code of Corporate Governance was adopted by the Authority in February 2017 and CIPFA's Financial Management Code was adopted by the Authority in July 2021. The Authority's compliance against the Financial Management Code was reviewed by Internal Audit during the year the report acknowledged that effective controls were in place regarding self-assessment, leadership, accountability, long term sustainability and value for money.

6.3	External assurance regarding the Authority's governance arrangements has been
	obtained through the Internal Audit Annual Report and the Financial Management Code
	audit (see sections 4.22 to 4.35).

- 6.4 All recommendations arising from internal audit reviews are actioned and monitored by SLT and Finance and Resources Committee. The relationship with the Internal Audit function is under continual development. The Internal Audit Charter was adopted by Finance and Resources Committee in June 2022.
- A provisional ISA 260 report was presented to Fire Authority in May 2022 which indicated that the External Auditors, Ernst & Young, are expecting to issue an unqualified 2020/21 Statement of Accounts (sections 4.36 to 4.41).
- 6.7 The Service's policies and procedures continue to be updated and reviewed (3.12).
- The Service continues to address any governance issues as they arise and commits to keeping governance arrangements under review.

Councillor Michael Payne	Craig Parkin
CHAIR OF THE FIRE AUTHORITY	CHIEF FIRE OFFICER

#### **Glossary**

#### **Accruals**

The concept that income and expenditure are recognised as they as earned or incurred, not as money is received or paid.

## **Budget**

A statement of the policy of the Authority expressed in financial terms. The budget is the financial element of a range of plans adopted by the Authority which include the Medium Term Financial Strategy and the Community Safety Plan.

# **Capital Expenditure**

Expenditure on the acquisition of assets or expenditure which adds to, and not merely maintains, the value of existing assets.

## **Capital Receipts**

Income derived from the sale of capital assets.

## **Chartered Institute of Public Finance and Accountancy (CIPFA)**

The principal accountancy body dealing with Local Authority and Public Sector finance.

# **Contingent Liability**

A possible obligation arising from past events whose existence will be confirmed by the occurrence of an uncertain future event not wholly within the Authority's control. It can also be a present obligation arising from past events where it is not probable that a transfer of economic benefits will be required or where the amount of the obligation is uncertain.

#### **Creditors**

Amounts owed by the Authority for which no payment has been made at the end of the financial year.

#### **Debtors**

Amounts due to the Authority for which no payment has been received at the end of the financial year.

# Depreciation

The measure of the wearing out, consumption or other reduction in the useful economic life of an asset during an accounting period.

## **Finance Leasing**

A method of financing the acquisition of assets. Legally the assets are owned by the lessor, although the risks and rewards of ownership of the asset pass to the lessee. The assets are shown on the Balance Sheet of the Authority.

#### **Financial Instrument**

Any contract which gives rise to a financial asset of one entity and a financial liability of another. Typical financial instruments are: trade payables, borrowings, bank deposits, trade receivables and investments.

#### **Non-Current Assets**

Tangible or intangible assets which yield benefits to the Authority for a period of more than one year. Tangible assets include land and buildings and certain specialist vehicles and equipment. Intangible assets include software.

## **Impairment**

A reduction in the value of an asset, which is additional to the expected depreciation of that asset. Impairment may be a result of, for example, physical damage or reducing prices.

### **Operating Leasing**

A method of financing the acquisition of assets, notably vehicles, plant and equipment which involves the payment of an annual rental for a period which is usually less than the useful life of the asset.

#### **Provision**

A liability or loss which is likely or certain to be incurred but where the date and precise amount are uncertain.

#### Reserve

An amount set aside for purposes outside the definition of provisions. Reserves include earmarked reserves set aside for specific policy purposes and balances which represent resources set aside for general contingencies.

#### **Revenue Contribution to Capital Outlay**

A fixed asset purchased directly from revenue contributions.

## **Revenue Expenditure and Income**

That expenditure and income which relates to the day to day activities of the Authority.
